# Introduction

More than a half-million readers have already been exposed to the controlled vocabulary in 1100 Words You Need to Know and the techniques that we devised to help them learn how to use those important words. We have received grateful letters from across the country and abroad, praising us for the timeliness of our selectionwords appearing in newspapers and books, on standardized exams, and in business correspondence.

That response is very gratifying. We realize that possessing a rich treasury of words brings material gains as well as confidence in one's ability to communicate and to be accepted as a mature person. As you spend the time to master the 1100 words and idiomseven 15 to 20 minutes dailyyou will discover the pleasure of recognition and understanding when you come across these challenging words in your listening, reading, and conversing.

For the Second Edition, published in 1987, we added word games that enhanced the learning process and analogies that were useful for those who were preparing for college entrance tests. In the Third Edition, we took into account the newly revised SAT format by creating words-in-context segments called WORDSEARCHES, one for each of the 46 weeks. Now, in this Fourth Edition, we have updated all of the material and added a major component, "The Panorama of Words," where you will find a valuable sentence reference for each of the words you have learned. The material presented is consistent with our successful blueprint of interest, variety, relevance, and repetition. Regard it as a dividend on your investment.

Reggie the Con Man

In the of crime, there are few scoundrels who could match the exploits of Reggie Hayes, who also
used the names of Reginald Haven, Ricardo Hermosa, Father Harris, and dozens of other aliases. Reggie's police
record, principally in Chicago and Baltimore, is  with scams that he perpetrated upon gullible
people. Generally, his favorite target was a 3 who should have known better.
Dressed as a priest ("Father Harris"), he was most convincing, however. His method of operation was to "find" a
wallet stuffed with hundred dollar bills outside a supermarket and then an unsuspecting woman to share his good fortune, since there was no identification in the wallet. But first, to establish her credibility, his victin had to put up a sum of money as a testimonial to her good faith. Mrs. Emma Schultz, age 72, tearfully told the police that she had withdrawn \$14,000 from her bank and placed it in a shopping bag supplied by the helpful priest. He tole her to hold onto the bag while he went next door to a lawyer's office to make the sharing of their good fortune legal.
After a seemingly wait, Mrs. Schultz discovered to her chagrin that the heartless thief had skipped

out the back way, leaving her "holding the bag" a switched bag containing shredded newspaperwhile he made his

Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.

The Best Laid Plans

Gloria Rogers overslept and then had to sprint to catch the same Greyhound Bus that she boarded on the last Thursday of every month. After a three-hour uneventful ride, she finally arrived at the bus terminal where a courtesy van was ready to transport bus passengers to Visitors Day at the State Penitentiary.

Although Gloria tried to act casual, she was more than a little nervous. Her boyfriend, Art, a convicted
, had managed to gain admittance to the prison's hospital on the of having a gall bladder attack. Under her own slacks and bulky sweater, Gloria was wearing a set of clothes that she removed in the hospital bathroom and passed on to Art. He planned to use them after making his escape in the back of the prison ambulance that was parked outside his ward.
Art had spelled out his escape plan during Gloria's last visit, spending an hour trying to her into being his accomplice. All that she had to do was appear to have a seizure. Then she would a story about her epilepsy while Art, with the smuggled clothes concealed under his prison bathrobe, would slip out of the
ward during the excitement. Unfortunately for the schemers, a hospital guard spotted Art climbing into the rear of the ambulance and quickly foiled the escape attempt. The result was that Art had three years added to his sentence and Gloria was imprisoned for her role in the misadventure.

5th Day Review

The word "review" means "to view again" and that is the purpose of our weekly review. You will have noticed, of course, that many of the words that appear as new words are repeated in subsequent lessons. Sometimes they are in the paragraph, sometimes in the sample sentences, and occasionally in the idioms or directions. This continued emphasis on "viewing again" will help you to become familiar with the vocabulary.

In the following quiz, match the best possible definition with the word you have studied. Write the letter that stands for that definition in the appropriate answer space.

Desert Storm Decision
In the 1991 Persian Gulf War, where the United Nations forces, led by Americans, ousted the invading Iraqi army
from Kuwait's soil, the of combat took place in short order after the Allies were able to
2 control of the skies from the 3 Saddam Hussein's air force.
General H. Norman Schwarzkopf, the U.S. field commander, tended to when asked by the media why he hadn't pursued the enemy all the way to Baghdad, saying:
"It would have been foolhardy for us to try to occupy that capital city and pile up American casualties from sniper attacks by Iraq's guerillas. That may be hard for you Monday morning quarterbacks to understand but I thoroughly agreed with the president who was convinced that such an action would have sent a bad message to the Arab world and would have splintered the Allied partnership."
Schwarzkopf reiterated that it was his mission to hurl back the invaders with a minimum of bloodshed but not, he
added in a tone, "to splatter Saddam over the desert sands. That dictator's days are numbered," the general concluded, "but I expect his end is likely to come at the hands of his own people."

Analogy Review (From Weeks 15)

You have completed the first five weeks of vocabulary study. You should now be ready for the first Analogy Review. The following exercise includes thirty words you have mastered. In order to test yourself, look at the first pair of words in each group. They are related either as synonyms or antonyms. When you have decided on the relationship, look at the third word, which has the *same* relationship to one of the four following words (ad). When you make the correct match, you will have completed an analogyrelating two words of a second pair in the same way as the first pair. Place the letter of the word that best completes the analogy in the space provided.

a. generous b. wise c. unfortunate d. cheerless
2. DISDAIN:RESPECT::SCOFF: a. praise b. amaze c. understand d. amuse
3. PAUCITY:PLENTY::DUPLICITY: a. uniqueness b. laziness c. fear d. honesty

Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.

Driving While Drunk
Throughout literature we find recurring tales of forthright people who are outspoken in condemning illegal practices only to be brought low themselves when they, or members of their families, commit such acts. Since literature
reflects life, we can expect to find similar instances in which a person's are compromised, and he falls prey to the evil that he had publicly denounced.
Take the story of Barry Vernon (not his real name), an aggressive Ohio district attorney. Vernon could be counted
upon to make 3 remarks about anyone who was driving while intoxicated. On numerous speaking
engagements, he railed against drunkenness and swore that any such who was found behind the wheel of a car would be prosecuted to the full extent of the law.
As fate would have it, Vernon's own son smashed into several cars, injuring four people seriously, and then failed a sobriety test.
Following that 5 violation of the law, Vernon resigned from office, saying that as a private citizen he would continue his crusade against those who drive under the influence of alcohol. Meanwhile, he wished to spend more time with his son to try to understand the young man's behavior.

My buddy Verne, a *precocious* automotive wizard, and I were inspired to do some inventing on our own. We thought it might be feasible\* to park a car parallel to a space on the street. Then, by pressing a button, we could raise the four tires off the ground slightly, while dropping two special wheels perpendicular to the curb. It would then be child's play to roll into the narrowest of parking spaces. We took the idea to Ed Greene who runs the Ford agency in order to elicit\* his reaction. After a *perfunctory* glance at our plans, to our *chagrin* Ed snorted that our idea was inane,\* but we decided that he was just jealous of our brilliance. Speaking of inventions and discoveries, I just learned that an eminent* scientist in Ohio has developed a pill that contains all the nutritive value of three complete meals. In addition to providing us with the vitamins and minerals we need daily, this pill also gives a feeling of fullness. According to its sponsors, the pill will nourish and satisfy. I hate to <i>disparage</i> such a <i>laudable</i> achievement, but to me it seems like a most objectionable discovery. Rather than a scientific triumph, I'd be inclined to label it as an egregious* blunder, a scientific disaster, a laboratory <i>fiasco</i> . Is there anyone in his right mind who thinks that a pill can replace the pleasures of devouring hot corn bread, <i>masticating</i> on a thick steak, biting into crisp french fries, or attacking a chocolate sundae? Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.

Trouble at Truman High

It was a quiet morning at Harry S Truman High School. "Too quiet," Principal Edna Suarez remarked to her secretary. "It's just when things are this serene that I start to get an uneasy feeling."

Mrs. Suarez's sensitivity to life among 3,000 teenagers quickly proved to be accurate. The first evidence of trouble came with a phone call from the teacher in charge of the cafeteria who needed help to \_\_\_\_\_\_\_ a disturbance. When Mrs. Suarez arrived on the scene, much to her \_\_\_\_\_\_\_, students were pounding on their tables, throwing food on the lunchroom floor, and making a complete \_\_\_\_\_\_\_ of school regulations. It took the principal only a moment to \_\_\_\_\_\_\_ who the two ringleaders were and to summon them to her office. Vincent, 16, and Elena, 15, admitted to having stirred up the protest. They gave as their reasons the poor quality of food served and the dirty environment. "It's like a pigsty down there," Elena declared, "and the food is fit only for animals!"

What they had done, Mrs. Suarez told them, was inexcusable, and she ticked off a list of reasons that made their conduct dangerous and subject to school discipline. "What you were trying to do," Mrs. Suarez explained, "might be considered by some but you could have come to me, alone or with a committee, to register your

I would have investigated and, if there was merit to your charges, would have taken the necessary action. Now I'll have to ask you to bring your parents to see me on Monday and to stay home until then."

Vincent and Elena seemed to be chastened by Mrs. Suarez's lecture. However, on leaving her office, Elena told an assistant principal that in a similar incident on a television show she learned that direct, dramatic action usually gets quicker results than lengthy debate. He advised her to bring that question up in her social studies class when she returned from suspension.

### Much Ado About a Haircut

Perhaps you read about our school in the newspapers? We were one of the first to have a showdown on the topic of long hair for boys. Two honor students, Ron Harris and Len Chester, were sent to the principal by their French teacher, an implacable foe of nonconformists, who went into a paroxysm of anger when she spied the boys in the hall. At first it seemed like a simple case. The school would reprimand\* the boys for their *reprehensible* appearance and order them to cut their hair or be suspended. But the boys' parents decided that the school had overstepped its *jurisdiction*; they took their case to the newspapers. What had started as a local skirmish now began to take on the appearance of a full-scale war.

The Reading of the Will
One full week after the funeral, the immediate family of millionaire Charles Hudson was gathered in a law office to hear the reading of the deceased's will. Mr. Hudson's wife, thirty years his junior, was prepared for a bitter
with his former wife and her son. The lawyer, Don Rollins, anticipated a session
because he was the only one who was of the contents of the revised will that Hudson had ordered drawn up six months prior to his death.
The current Mrs. Hudson, attired in her smart widow's weeds, expected that she would receive the lion's share of the estate. The former Mrs. Hudson felt that she was entitled to most of the estate since she was practically
4 at the present time, despite her substantial alimony payments.
Lawyer Rollins cleared his throat and began to read:
"To my present spouse I leave my town house where she can continue to store the jewels, shoes, dresses, and furs she accumulated in two years of shopping and marriage.
"To my son, who has put off finding a career until my estate would enrich him, I leave the sum of ten dollars for cab fare to the unemployment office.
"To my former wife whose behavior I tolerated for three decades, I leave my beach house where she can continue to work on her tan, something that she prized above our happiness.
"To the Society For the Prevention of Cruelty to Animals I leave the remainder of my entire estate, knowing they will put it to better use than anyone in this room."
The lawyer was wrong. No outcries. Silence, supreme silence, reigned among the shocked audience.

# Enter Dr. Thomas A. Dooley

In 1956, Look Magazine named Thomas Dooley as one of the year's ten most outstanding men. Just under thirty years of age at the time, Dr. Dooley had already distinguished himself by caring for a half-million sick and emaciated Vietnamese refugees. When fighting broke out in the divided country of Viet Nam, the northern Communist Viet Minh forces surged southward, scattering thousands of refugees before them. At the time, Dr. Dooley was a lieutenant, assigned to a tranquil naval hospital in Yokosuka, Japan. Forthwith\* he volunteered for duty on a navy ship that had been chosen to transport the refugees to sanctuary in Saigon. The curtain was beginning to ascend on Dooley's real career.

## Dooley's Mission

Aboard the refugee ship, Dooley's destiny took shape. He became painfully cognizant\* of the *malnutrition*, disease, ignorance, and fear that *afflicted* the natives. In addition, he discerned\* how active the Communists had been in spreading their anti-American propaganda. Tom Dooley pitched in to build shelters in Haiphong, and to comfort the poor Vietnamese there before that *besieged* city fell to the powerful Viet Minh forces. He was seemingly unconcerned by the many *privations* he had to endure. For his services, Dooley received the U.S. Navy's Legion of Merit. He told the story of this exciting experience in *Deliver Us from Evil*, a best seller that alerted America to the plight of the Vietnamese as well as to the *sinister* menace of communism.

## Stymied\* by Personal Sickness

After an extensive lecture tour in 1956, Dr. Dooley returned to Laos to set up a mobile medical unit. Because the Geneva Agreement barred the entrance of military personnel to the country, he resigned from the Navy and went to work as a civilian. That story is told in *The Edge of Tomorrow*. Next year, despite a growing illness, the *ubiquitous* Dooley turned up in the *remote* village of Muong Sing, attempting to *thwart* his traditional enemies disease, dirt, ignorance, starvationand hoping to quell\* the spread of communism. But his trained medical eye soon told him that the pain in his chest and back was a *harbinger* of a *malignant* cancer.

"Promises to Keep"

From August, 1959 until his death in January, 1961, Dooley suffered almost continuous, *excruciating* pain. His normal weight of 180 was cut in half, and even the pain-killing drugs could no longer bring relief. Knowing that he did not have long to live, Dr. Dooley worked without *respite* on behalf of MEDICO, the organization he had founded to bring medical aid and hope to the world's sick and needy. The lines of Robert Frost kept *reverberating* in his mind during those *fretful* days: "The woods are lovely, dark and deep/ But I have promises to keep/ And miles to go before I sleep." When he finally *succumbed*, millions throughout the world were stunned and grief-stricken by the tragedy.

# Just Spell the Name Correctly

P. T. Barnum, the great circus *impresario*, was once accosted\* by a woman who showed him a scurrilous\* manuscript about himself, and said that unless he paid her, she would have the book printed. Barnum rejected the *extortion* attempt. "Say what you please," he replied, "but make sure that you mention me in some way. Then come to me and I will estimate the value of your services as a publicity agent." Barnum obviously felt that *adverse* criticism was an *asset* for a public figure. A man who seeks the limelight should not care what is written about him but should be concerned only when they stop writing about him. Barnum's philosophy suggests that we might do well to review the plethora\* of publicity given to rabble-rousers and *bigots*.

# **Bigots\* Get Publicity**

Today, the *blatant* bigot, the leader of a lunatic fringe, and the hate-monger, each with his tiny *entourage*, find it relatively easy to attract publicity. Newspapers give space to the *virulent* activities of those agitators on the grounds that they are newsworthy. TV producers and radio executives, seeking for sensationalism, often extend a welcome to such controversial characters. "Yes," said the host of one such program, "we invite bigots, but it is only for the purpose of making them look ridiculous by displaying their inane\* policies to the public." Some civic-minded organizations have answered, however, that the hosts are not always equipped to demolish those guests, and even if they were, the audience would still be exposed to the *venom* they *spew* forth.

# Coping with Bigots\*

Suppose a bigot wished to organize a meeting in your neighborhood. Since we cherish freedom of speech, we are *loath* to deny the request, even if he preaches hatred. As a result, hate-mongers are given the opportunity to rent halls, conduct meetings, publish abusive literature, and *solicit* contributions. What can be done about them? One *astute* observer, Prof. S. Andhil Fineberg, *advocates* the "quarantine method." His plan is to give such groups no publicity and to ignore them completely. Without the warmth of the spotlight, he feels that the bigot will freeze and become *ineffectual*. Debating with such warped minds is not feasible\* and only tends to exacerbate\* the situation.

#### More than Silence

The quarantine method for handling bigots implies more than giving them the silent treatment. Prof. Fineberg urges community-relations organizations to *scrutinize* the *nefarious* activities of hate-mongers and to be prepared to furnish information about them to *amicable* inquirers. When a rabble-rouser is coming, those organizations should privately expose him to opinion-molders. In addition, constructive efforts should be taken to induce people to involve themselves in projects for improving intergroup relations. Bigger than the *vexatious* immediate problem is the need to find out the cause for such bigotry and to counteract this sinister\* *malady* that afflicts a segment of our society.

This Century's Deadliest Disease

When the American public started to hear about the AIDS virus in the 1980s, there was a measure of concern but no real alarm. After all, some said, it was a problem solely for a small group of intravenous drug users who shared dirty needles, and for the homosexual community.

But as the numbers of afflicted people grew during the 1980s and 1990s, we began to

news stories more closely. The deaths of young people like Ryan White and Kimberly Bergalis, not members of the
at-risk groups referred to above, convinced us that what was at first regarded merely as a 2 illness
was actually a 3 threat to the general community.
In the mid-1980s, medical researchers were optimistic that a vaccine for AIDS would be found in short order. Those predictions proved to be inaccurate. In October 1992, former Surgeon-General C. Everett Koop said that he doubted we would ever find a cure for the disease. With over 200,000 Americans already having
succumbed to the succumbed to the killer, and another 300,000 who were HIV-positive and could contract a full-blown form of AIDS, Koop's statement sent chills throughout the country.
A prominent AIDS expert, however, took issue with Koop. "The fight will be difficult," said Dr. Harley Smith, "but we will find an answer before the and of the 20th century."

we will find an answer before the end of the 20th century.

#### A Time for Decision

The doctor explained the situation calmly, avoiding *histrionics*. First of all, they didn't know whether the dog had rabies. Secondly, the *elusive* dog had *frustrated* all attempts to find him so far. Finally, the decision would have to be made whether Bobby was to undergo the painful vaccination administered daily for two weeks. Mrs. Hart said that a neighbor who had seen the dog claimed that it had been foaming at the mouth, barking, and growling constantlyall *symptomatic* of rabies. But the policeman *interjected* that there hadn't been a case of a mad dog in the county in over twenty years; he repudiated\* the neighbor's report, advocating\* that they do nothing for at least another day. Mr. and Mrs. Hart sat down to think about their next step.

# The Pertinent\* Facts about Rabies

"Give me some of the rudimentary\* information about the disease, Doc," said Jerry, glancing toward the *inert* figure of his son. "Well, as you know, the malady\* used to be called 'hydrophobia' (fear of water) because one of the symptoms is an inability to swallow liquids. Actually, it is caused by a live virus from the saliva of an infected animal. If saliva gets into a bite wound, the victim may get rabies. The virus travels along the nerves to the spine and brain. Once the *salient* characteristics appear (ten days to six months) then death is *imminent*." "What are the symptoms?" asked Mrs. Hart. "Pain and numbness. difficulty in swallowing, headaches and nervousness. Also, muscle spasms and convulsions." The *squeamish* neighbors who were *engrossed* in the doctor's remarks gasped. "I think we should go ahead with the injections," the distraught\* Mrs. Hart said. "I've heard enough."

The Potato that Strangled Idaho
People who areabout the sight of blood orin horror from most forms of violence would do well to avoid some of the movies now being shown at their local cinemas. Producers have learned that films that scare the patrons out of their seats, ironically, put millions of fans into those seats, keeping them in the goose pimple-inducing spectacles that flash across the screen.
Of course, each movie carries with it a rating that indicates its suitability for certain age groups, either because of its subject matter, language, presentation, or level of violence. Pictures with a "G" rating are approved for all audiences while, at the other end of the scale, those that are given an "X" rating are for adults only with no children allowed under any circumstance. Getting an "R" rating indicates that the movie is restricted (no one under 18 admitted without an adult) but some Hollywood moguls consider the "R" to be the magnet that insures box office success. And we can be sure that as long as shock films ring up a merry tune on the cash registers, producers will not from making them.
nom making them.
A director who specializes in making gory films involving monsters, vampires, and brutal serial killers boasted in a college lecture that his work was in good taste. One student who disasgreed was provoked to that in his opinion the diet of "shock-schlock" movies was in worse taste than those pictures that contained vulgar
language and nudity. "At least they're honest," he declared.  Clues

The normally *phlegmatic* Jerry Hart was deeply upset. Twenty-four hours had passed without result, and even if the rabies could not be *corroborated*, Jerry was determined to see that his son received the vaccine. At the suggestion of some friends, he organized a *comprehensive* search party, *zealously* fanning out in circles around the supermarket. They knocked on every door, inspected every dog, and came back empty-handed. Although the Harts were sick with worry (they had to be *coerced* into going to sleep), little Bobby seemed to be in great spirits. The excruciating\* vigil continued.

# The Police Find the Dog

Forty hours had *elapsed* before the police work and the publicity paid off. By *meticulously* checking the registrations of every red station wagon in the neighborhood and then cross-checking dog licenses, the police narrowed the search to four owners. After a few telephone calls, the apologetic owner was located and directed to bring her muzzled German shepherd to the Hart *domicile*. Bobby identified the dog, and the animal was taken to a veterinary's clinic to have the necessary tests performed. The *lax* owner, Mrs. McGraw, admitted that the dog had a *sporadic* mean streak, but she scoffed\* at the idea of rabies. Jerry Hart noticed for the first time in two days that his uneasy feeling had departed.

The Harts were greatly relieved to learn that the *rash conjecture* about the dog was not true. Because the German shepherd was not rabid, the necessity for the painful treatment was *obviated*. The police gave the dog's owner a summons for allowing the animal to go unmuzzled. Little Bobby was treated to an ice cream sundae and a Walt Disney double feature. The neighbors searched for other *lurid* happenings, and Jerry Hart went back to his office. "What kind of dog was that?" his secretary asked. "Oh, his bark was worse than his bite," *quipped* Jerry.

## Irony for Merryweather

At last, Monte's chance to perform came. He had played the *timorous* Lion in a *truncated* version of "The Wizard of Oz," which the apprentices had staged. But now there was an open audition to cast the final show of the season. It was to be a *jaunty* original comedy, given a summer tryout prior to a Broadway opening. Monte, who by now had adopted the stage name of Monte Merryweather, read for the producers, hoping to get the part of the hero's *fractious* landlord. Unfortunately, the competition was too roughbut the director assigned Monte to a less *ostentatious* part. And so for the first two weeks in September the stagestruck accountant had a two-minute, two-line part. What was his role? The hero's accountant!

Regis, Oprah, Sally Jessy, et. al.
The television talk shows of our era, featuring such and Sally Jessy Raphael, attract millions of daytime viewers and constitute a powerful influence on the American scene. When the media can hold the attention of so sizable a chunk of couch potatoes, it pays to scrutinize it closely.
A student at Stanford University, doing her doctoral thesis on the unusual popularity of the afternoon talk shows, noted the fierce competition among those programs for guests who are off the beaten track. According to her:
"Almost every irregular,  life-style you can think of has already been featured on one of the shows
and probably on all of them, when you add Montel Williams, Jerry Springer, and others of that who serve as network hosts. They have shown teenagers who marry people in their sixties, daughters and mothers who date the same man, men who have gone through a marriage ceremony with other men, women with prominent
tattoos, and other people who are totally free of 4"
" for our guests is so small," said a producer, "that these shows are inexpensive to put on. And say what you want about good taste, millions watch us every day, and as long as the ratings are that healthy, sponsors will pay good money to be identified with us."

## A Visit to the President

im' pör tün'

In the winter of 1941, Enrico Fermi and a number of other distinguished scientists importuned President Franklin Roosevelt for authorization to begin an all-out effort in atomic energy research. The scientists were alarmed by incontrovertible evidence of surreptitious German experiments, and they asked for speedy approval. Italian-born Enrico Fermi was the ideal man to lead the atomic research. Already in 1938 he had won the Nobel Prize for work with radioactive elements and neutron bombardment. Fermi had found a haven from the Fascists (his wife was Jewish) and he knew that if the Germans were the first to develop an atomic bomb it would mean that Hitler could *subjugate* the entire world. The international race for atomic supremacy was on.

The Ultimate Weapon Takes Shape

Enrico Fermi designed a device that could *eventuate* in a chain reaction. It consisted of layers of graphite, alternated with chunks of uranium. The uranium *emitted* neutrons, and the graphite slowed them down. Holes were left for long cadmium safety rods. By withdrawing those control rods Fermi could speed up the production of neutrons, thus increasing the number of uranium atoms that would be split (fission). When the rods were withdrawn to a critical point, then the neutrons would be produced so fast that the graphite and cadmium could not absorb them. In that manner a chain reaction would result. Slowly, Fermi's first atomic pile began to grow in a *subterranean* room at Columbia University. The big question remainedwas it *viable*?

## The Squash Court Experiment

As the pile grew, so did the entire project. Fermi moved his materials to an abandoned squash court under a football stadium at the University of Chicago. His pace accelerated because they were proceeding on the *premise* that the Germans were close to atomic success. Six weeks after the pile had been started, its critical size was reached. Three brave young men *jeopardized* their lives by ascending\* the pile, ready to cover it with liquid cadmium if anything went wrong. Almost fifty scientists and several *incredulous* observers mounted a balcony to watch. One physicist remained on the floor; it was his job to extract the final cadmium control rod. Unbearable tension *permeated* the atmosphere. Fermi completed his calculations, waited for a *propitious* moment, and then gave the signal.

The chain reaction took place precisely as Enrico Fermi had *surmised*. After twenty-eight minutes he *curtailed* the experiment, giving the signal to replace the control rod. The normally reserved scientists, unable to *repress* their excitement, let out a tremendous cheer and gathered around Fermi to shake his hand. 14th Week 1st Day New Words aspire inveigh nettle relegate overt ō' vert ə spīr´ rel´ə gat Sunday Morning at Pearl Harbor At breakfast time on Sunday morning, December 7, 1941, Dorie Miller was serving coffee aboard the battleship West Virginia. Dorie was black, and the highest job to which he could then aspire in the U.S. Navy was that of messman. While Dorie was technically a member of a great fighting fleet, he was not expected to fight. Most Army and Navy officers inveighed against blacks as fighting men. Although blacks were nettled by such overt prejudice, Dorie Miller apparently accepted being *relegated* to the role of a messhall servant. Now, as he poured the coffee, Dorie was wondering why the airplanes above were making so much noise on a peaceful Sunday morning. Sample Sentences Use the new words in the proper blanks. 1. ## The Infamous\* Attack

The coffee cups suddenly went spinning as an explosion knocked Dorie Miller flat on his back. Jumping up from his *supine* position, the powerfully built messman from Waco, Texas, headed for the deck. Everywhere that Dorie looked he saw smoke and *mammoth* warships lying on their sides. Overhead dozens of Japanese dive bombers controlled the skies without a U.S. plane to *repulse* their attack. The *havoc* was enormous. Without hesitating, Dorie joined a team that was feeding ammunition to a machine gunner who was making an ineffectual\* attempt to protect their battleship from being *razed* by the torpedo planes.

#### The Heroism of Dorie Miller

Men all around Miller were succumbing\* to the *lethal* spray of Japanese bullets. He dragged his captain to safety and turned back to see that the machine-gunner had been killed. Dorie took the big gun and trained it on the incoming bombers. Within the space of ten minutes he was credited with destroying four bombers while dodging the bullets of their fighter escorts. The enemy *scurried* away, having struck the *incisive* blow that *precipitated* U.S. entrance into World War II. Amidst the dead bodies and the ruined fleet were the heroes such as Dorie Miller. The Navy had told him that he did not have to fight but he hadn't listened. The Navy had attempted to *stereotype* him, but Dorie changed all that.

The Effects of the Es	cobedo Decision			
After Danny Escobedo's release from prison, hundreds of inmates began suits for their freedom on the grounds that their rights had been violated, too. Each case was heard on its merits, and in numerous instances people who had been convicted of serious offenses were freed because of the new standards established in the Escobedo case. After getting out, Danny was not a <i>paragon</i> of virtue, according to the police. He led a <i>nomadic</i> existence, drifting from job to job, and was arrested frequently. With <i>asperity</i> , and a few choice <i>epithets</i> , Danny referred to police harassment.* Although the Escobedo case was a <i>controversial</i> one, most agree that it inspired better police training, better law enforcement procedures, and improved scientific crime detection.

Analogy Review (From Weeks 1115)

By now you may have realized that the antonyms of the words you have studied often present problems. First you have to know the synonyms and then figure out what the opposite meanings are. This provides a good test of your mastery of new words. Place the letter of the word that best completes the analogy in the space provided. When you have checked your answers, immediately refer to the word or words you have missed. Instant review of words that you have not completely mastered will bring good results.

# Wordsearch 15

Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.

# Questionable Advertisements

The Nostalgia Factory, a Boston art gallery, staged an exhibit of advertisements that had outraged various segments of the community. For example, one of the fast food chains ran a TV commercial that showed unattractive school cafeteria workers in hairnets, making that experience less tasty than a visit to Roy Rogers. Another ad that drew criticism from psychiatrists and groups such as the Alliance for the Mentally III suggested to readers that, if they had paid \$100 for a dress shirt, they were fit candidates for a straitjacket. Similar sensitivity had restricted ad writers from using terms such as "nuts" or "crazy."

Why such protests and where do they come from? Who is asking companies to contracts with those
agencies that are in creating racist types of commercial messages? Parents who took exception to the Burger King spot that announced, "Sometimes You Gotta Break the Rules," said no to it because it gave the wrong message to their children. And when a potato chip maker's ad featured a "bandito," angry Mexican-
Americans used some choice 3 in denouncing such a stereotype.
The conclusion to be reached is that segments of the population have become increasingly vocal about "insensitive"
ads, demanding that corporations 4 and never again commission advertisements that are clearly
(5), provocative, and harmful to good human relationships.

# Meet the Bees

One of the most interesting inhabitants of our world is the bee, an insect that is *indigenous* to all parts of the globe except the polar regions. The honeybee is a *gregarious* insect whose *habitat* is a colony that he shares with as many as 80,000 bees. Although the individual bees live for only a few days, their colony can be operative for several years. A *cursory* study of the activities of these insects reveals an orderliness and a social structure that is truly amazing. For example, bees in a particular hive have a distinct odor; therefore, when an *interloper* seeks access\* they can identify him quickly and repulse\* his invasion.

# Queens, Workers, Drones

Each colony of honeybees consists of three classes: a) the queen who is a *prolific* layer of eggs; b) the worker who is the *bulwark* of the colony; and c) the *sedentary* drone whose only function is to mate with a young queen. The queen lays the eggs that hatch into thousands of female workers; some queens live as long as five years and lay up to one million eggs. The *frugal* worker builds and maintains the nest, collects and stores the honey, and is the *antithesis* of the lazy drone, or male honeybee, who does not work and has no sting. When the drone is no longer needed, the workers, in effect, liquidate\* him by letting him starve to death. It's a cruel, cruel world!

# Spotlight on the Worker

Let us examine the activities of the *altruistic* workers in greater detail. After the workers have constructed a hive of waterproof honeycomb (made from beeswax), the queen begins to lay eggs in the first cells. While some workers *embellish* the hive, others fly out in search of nectar and pollen. With their long tongues they gather nectar and use their hind legs to carry the pollen from the flowers. They fly directly back to the hive and then dance around the honeycomb, their movements indicating the direction of the flowers. Meanwhile, other workers have been cleaning cells, caring for the young, and guarding the precious *cache* of nectar. Another special *coterie* is entrusted with heating or cooling the hive. Dedicated to the welfare of the queen and the entire insect community, all of these workers display a complete absence of *cupidity*.

The Saga of the Queen Bee

Although the *virtuosity* of the workers is remarkable, the queen bee is really the main story. Workers choose a few larvae to be queens, feeding them royal jelly, a substance rich in proteins and vitamins. While the queen is changing from a larva to a pupa, a team of workers builds a special cell for her. Soon the young queen hatches, eats the prepared honey, and grows strong. After she kills any rivals who have the *temerity* to challenge her, an *amorous* note is injected. She flies from the hive and mates with one or more drones on her first flight. Then the process of egg laying begins. When her *progeny saturate* the hive, scouts are dispatched to find a new location, and the bees swarm after their leader to begin the amazing cycle again.

Cheating a Cheater

"Our neighborhood was so tough," the comedian joked, "that two guys held up a bank and were mugged as they ran to their getaway car."

Later that evening, as Roy and Timmy were discussing the comic's routine, Roy was reminded of a true (he said) story that went like this:

Mr. D., the gang kingpin in our community, loved money. Like Silas Marner, the weaver of George Eliot's novel, he enjoyed counting his treasure each Friday night. Mr. D's was concealed in a wall safe behind a painting in his office. The \$50 and \$100 bills made his hands dirty as he counted them but Mr. D didn't mind. The filth of the lucre did not disturb him at all.
One Friday evening, Roy continued, a brash had the to try to steal the ill-gotten gains. Having bought the combination from a relative who had installed Mr. D's safe, he stuffed his loot into a laundry bag and was halfway out the door when he spied a \$10 bill on the floor. His made him go back for that small change, and in that moment, Mr. D. arrived on the scene.

The quick-thinking thief blurted out, "I'll have the shirts back on Friday." Hoisting the laundry bag over his shoulder, he was out the door before the confused mobster could figure out what had happened.

Timmy, who had listened patiently, said, "I don't believe a word of that story because it would take a guy with a great deal of *starch* to pull it off!"

"Major Martin" Goes to War

After Commander Montagu and his colleagues had been given official approval for their dangerous escapade, they encountered *manifold* problems. First, they conducted an *assiduous* search for a body that looked as though it had recently been killed in an airplane disaster. Then, a detailed history of the man had to be invented that would be so *impeccable* that the enemy would accept its authenticity. Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.
Brother, Can You Spare a Dime?
The U.S. Department of Health and Human Services, in an review of Social Security disability
payments, focused on Jack Benson, a Seattle panhandler. Mr. Benson had claimed that whatever money he collects on the street can be compared to the funds raised by legitimate charities, and, therefore, he is
entitled to a federal deduction. Government officials regard his analogy as and disagree. It is their contention that, since Benson's income is unearned, it should be subtracted from his disability payments.
Mr. Benson may not be highly regarded as a street beggar but that didn't stop him from going into the Federal District Court in Oregon to plead that his appeals for cash are an art form, thereby making him eligible for most of the \$472 a month that he had been receiving. Not so, declared the government, quoting from a 1990 ruling that found that "money received through begging is better classified as 'gifts' rather than as 'wages' or 'net earnings from self-employment."
Mr. Benson's lawyer, plunging into the legal, has not given up. She countered that, if Jack merely sat on a street corner with his hand out, the government had a good case. However, in her words, "Jack Benson is a professional who has elevated begging to a respectable level because of his skill in actively seeking contributions."
It may take all of Benson's talent as a salesman to get the government to put some money in his collection basket.

# A Shameful Situation

The plight of the migrant farm worker continues to frustrate the U.S. Labor Department, court officials, legislators, religious groups, and community agencies. Men, women, and children toil six and seven days a week to earn as little as \$5 to \$10 a week after being overcharged for their food, medicine, and basic living needs. They are housed in
ramshackle dormitories, often with non-functioning toiletsa of their employers' contempt for them; they lack hot water and showers, and are given food that is barely fit for human consumption.
Unscrupulous contractors scour the countryside in search of homeless,, and unemployed men and women, offering to put them to work at good jobs picking fruits and vegetables. The U.S. Labor Department
investigates the 3 of complaints of abused workers, issues fines, and revokes the licenses of
contractors. But many such shady employers pay the fines (which they 4 to be operating expenses)
and continue to run company stores that cheat the workers, subjugate them with drugs and alcohol,
them with advances on their paltry wages at high interest, and use violence against those whom they regard as troublemakers.

Fred Jones, a typical migratory worker from South Carolina, claims to have worked for \$6 cash out of his \$158 check. His story is repeated by hundreds of others who have been treated shabbily by corrupt contractors. Until sufficient funds are allocated by state and federal agencies, and until there is the proper public response, these abuses will continue.

① Despite the lack of hard evidence, some people continue to believe that the depths of our lakes
and isolated mountain caves remain the dwelling places of fantasy figures.

Now, a new star for the credulous has surfaced. Japanese television was asked to \_\_\_\_\_ a search for Ogopogo, a long-necked reptilian creature said to inhabit Lake Okanagan in the mountains of south-central British

Columbia. Ogopogo stories are \_\_\_\_\_ in that area as people produce photos of rippling water and shadows resembling an enormous serpent with flippers, gliding slowly in large circles.

Those who \_\_\_\_\_ at what they regard as nonsense and pagan superstition are quite \_\_\_\_\_ in belittling Ogopogo fans. Nevertheless, the legends, which have a life of their own, happily, have brought thousands of tourists and business to the Okanagan Valley.

Recognition of the creature now exists in British Columbia's environmental law which provides protection for Ogopogo. The official description reads, "An animal in Okanagan Lake, other than a sturgeon, that is more than three meters in length, and the mates or offspring of that animal."

Been wondering about the creature's name? Ogopogo comes from an English music hall song: "His mother was an earwig; his father was a whale; a little bit of head and hardly any tailand Ogopogo was his name."

History's Most Extraordinary Person?

In a celebrated essay about Joan of Arc, Mark Twain wrote movingly of her brief moment in the spotlighttwo short years in which she made an indelible mark on world history. At age 16 she was illiterate, had never strayed from her

sleepy little village, knew nothing of military combat, or courts of law. But at age 17, in a complete she was named Commander-in-Chief of the French army, vowing to restore her king to his throne. Joan attracted

many fervent followers, and a 2 \_\_\_\_\_ called her "France's 3 \_\_\_\_\_ ."

After much gallantry in battle, this \_\_\_\_\_ heroine was brought low by treachery at the French court and captured by the enemy. Joan defended herself brilliantly at a court trial, although she could neither read nor write. She was able to forecast future events with remarkable accuracy, correctly predicting her own martyrdom.

Mark Twain understood how geniuses such as Napoleon, Edison, and Wagner could develop but one could

the facts for a lifetime without being able to explain how this humble peasant girl could display the qualities of a mature statesman, a learned jurist, and a military wizard. He concluded:

"Taking into account her origin, youth, sex, illiteracy, early environment, and the obstructing conditions under which she exploited her high gifts and made her conquests in the field and before the courts that tried her for her lifeshe is easily and by far the most extraordinary person the human race has ever produced."

#### A Profile of the Woman Who Drinks to Excess

The typical alcoholic woman is above average in intelligence, in her forties, married, with two children. She started drinking socially in high school or college. Although frequently incapacitated, she can fabricate a story skillfully and thus conceal her true physical condition. She often attributes her alcoholism to connubial stress, boredom, or depression. A large percentage of the women give family histories of alcoholism. Most female drinkers would *demur* at the *appellation* of "alcoholic" and that makes their treatment all the more difficult.

#### From A to Z

Ellis Sloane, a teacher of science at a large metropolitan high school, first paid little attention to the fact that his two biology classes were so disparate\* in their performance. In most schools the classes are alphabetically *heterogeneous*, with youngsters' names running the *gamut* from Adams to Zilch. But Biology 121 had only A's and B's, whereas Biology 128 had T's, V's, W's, Y's, and Z's. Mr. Sloane, a *perspicacious* teacher, began to perceive\* differences between the two groups: while their reading scores and I.Q.'s were roughly *analogous*, it was apparent that Biology 128 was replete\* with *maladjusted* students, while Biology 121 had the normal ones.

The Perils of the Alphabet

Dr. Weston is convinced that the *pedagogue* is the culprit.\* Since teachers seat their pupils in alphabetical order, the "S" to "Z" child is usually the last to receive his test marks, the last to eat lunch, the last to be dismissed, and so on. As they are the last to recite, these youngsters feel frustrated\* because what they had to say had usually been enunciated earlier. The inordinate amount of waiting that this group has to do causes them to become irascible and jittery. "S" to "Z" people also become quite introspective, convinced that they are inferior to those at the top of the alphabet.

During the Middle Ages most people believed that the devil could enter our bodies when we sneezed, because at that propitious\* moment we left our bodies *vulnerable*. However, this catastrophic\* event could be avoided if another person immediately made an *entreaty* to God. This was how the practice began of saying "God bless you" after someone sneezes. Although the *tradition* continues today, few people are aware of its history. A superstition *originates* in ignorancewhen people are unsure of the causes of events. But it continues *inviolable* over the years because it usually represents our deepest fears.

5th Day Review

And today it's time to strengthen your word knowledge again. You've noticed, of course, that the matching definitions are not always the definitions you may have been familiar with. This is the way language works. It is impossible to provide a one-word synonym or simple definition for a word that you will always be able to substitute for it. Therefore, in our weekly review we hope not only to check your learning, but also to teach you closely related meanings.

Match the best possible definition with the word you studied. Write the letter that stands for that definition in the appropriate answer space.

## The Explosion of Krakatoa

There are few sights that are more impressive and *awesome* than the *eruption* of an active volcano. There are few natural events that so singularly\* dwarf man's *puny* attempts to control his environment. Perhaps the greatest volcanic *eruption* of modern times took place in 1883 when the island of Krakatoa in Indonesia blew up as the result of a volcanic explosion. An enormous tidal wave resulted that proved catastrophic\* to the nearby coasts of Java and Sumatra. New islands were formed by the lava that poured out, and *debris* was scattered across the Indian Ocean for hundreds of miles. Volcanic material, *dispersed* seventeen miles into the atmosphere, created startlingly beautiful sunsets for years afterwards.

## A Universal\* Danger

Man's ability to *obliterate* life on this planet has increased at a rapid rate. We are now faced with the *deplorable* prospect of new weapons that can cause destruction of life and property on a scale far beyond our imagination. No matter who takes the first step to *initiate* a conflict, the possibility exists that the *conflagration* will spread and envelop the world. Much thought has been given to ways and means of preventing this catastrophe.\* Some consider it mandatory\* that the nuclear powers seek agreement on methods of limiting and controlling these weapons, for in the absence of such an agreement, we may *rue* the day atomic energy was made practical.

#### Taken for Granted

The presence of an ever-flowing supply of fresh, clean water is taken for granted. Unfortunately, this congenial condition is fast disappearing. As our population increases, as industry consumes more water each year, the level of our underground water supply sinks measurably. There is no way to *hoard* water; there are many ways to conserve it. During a particularly dry spell, New York City found its reservoirs going dry. Only then did the residents begin to heed the sage advice to limit the wasteful uses of water. Under the aegis of the Water Commissioner, citizens were encouraged to develop habits that would save water. The continued imprudent\* waste by each of us of this most basic resource will work to the detriment of all.

## An Ageless Story

Every so often we can read about a man or woman who has reached an age far beyond the limits we ordinarily expect. Reports of a man in Chile or a woman in Turkey who has celebrated the 105th or 110th birthday occur regularly. The natural question is, to what do these people owe their *longevity*? Frequently, the answer concerns the fact that the ancient one liked to *imbibe* regularly of some hard liquor. The photograph will show an apparently *virile* man or robust woman. Somehow, people who reach this advanced age seem to remain eternally sturdy. There are no signs that they have become *senile*. Smoking a pipe, or sewing on some garment, these rare specimens of hardy humanity are far from the *doddering* folk we expect to see.

# The Lack of Foreign News

The critics *rebuke* the press for the fact that most newspapers devote somewhat less than 10 percent of their news space to foreign items. In many hundreds of papers this falls below two percent. Why is there this *aversion* to foreign news? Newsmen claim that readers *evince* no interest in foreign affairs. In order to increase reader interest in foreign news, the *vogue* among editors is to sensationalize it to the point of distortion. Many other papers do only the most *superficial* kind of reporting in this area.

The Wild West

History tells us that, in a showdown in 1881, a notorious outlaw, Billy the Kid, was killed. At least that is the \_\_\_\_\_\_ belief. The real Billy the Kid, William Bonney, is believed to have escaped and lived for many years in Texas. In fact, a man named Brushy Bill Roberts claimed to be the grown-up Billy the Kid.

When Roberts died in 1950, there was the question about his true identity. As a result, a computer was brought in to test whether there was anything other than a \_\_\_\_\_\_ resemblance between the two men. A photo of the Kid and a photo of Roberts were compared on the computer.

In a eport from the computer technician, the identity of Roberts was proved to be different from

# A Worthy Successor

A successor to Beethoven was Johannes Brahms. Also a prodigy,\* he was the object of vitriolic attacks by other composers because of the individuality of his work. They heaped invective upon him for the intensely emotional quality and Germanic style of his writings. #### Gruff but Likeable

In his private life Brahms was considered by his friends as an *egotist*. He had an extremely lofty opinion of himself and his talents. He was not noted for his *humility*. Along with this quality, Brahms was known for his *pungent* sense of humor. While his closest friends could accept his biting jokes, others found him difficult to warm up to. Brahms was an inveterate stay-at-home. Cambridge University conferred an honorary degree upon him, but he was adamant about staying at home and did not go to receive the honor. Despite the ardent\* and romantic nature of his music, Brahms never found the right girl and remained single throughout his life.

# A Dangerous Sport

Racing car drivers are *vulnerable* to dangers that other sportsmen seldom face. Drivers agree that controlling a car at top speeds on a winding course is a singularly\* awesome\* experience. There is the *bedlam* caused by the roaring motors that move the car from a standing start to 100 miles an hour in eight seconds. One is shaken by the *cacophony* of the brakes, larger than the wheels and producing during the course of a 350-mile race enough heat to warm an eight-room house through a hard winter. The driver needs to be on the alert to *exploit* any mistake by an opponent, and he must be constantly aware of the *propinquity* of sudden death. All of this makes car racing one of the most demanding games of all.

How was your recall today? Did you spot vulnerable as a reintroduced word?

## A Sport for Everyone

Of the many highly popular sports in the United States, football must be rated around the top. This sport allows the speedy and *lithe* athlete to join with the slower and *obsese* one in a team effort. The skills and strengths of many men are welded together so that one team may work as a unit to gain mastery over its opponent. The knowledgeable *adherent* of a team can follow action covering many parts of the playing field at the same time. He is in a state of *bliss* when his team executes a movement to perfection. However, there is no one more *pathetic* than the same fan when the opposition functions to equal perfection.

# Rah! Rah! Rah!

The spectators at a football game play more than a superficial\* role. A spirited cheer from the stands often gives the player on the field a reason to try even harder. Cheer leaders *exhort* the fans, who may be in a state of *apathy* because their team is losing, to spur on the team. In particularly close games between rivals of long standing, feelings begin to run high, and from time to time a *fracas* may break out in the stands. While the teams compete below, the fan who is a bit *inebriated* may seek out a personal *adversary*. On the whole the enthusiasm of the spectators is usually constricted\* to cheering and shouting for their favorite teams.

### The 23-Inch Football Field

The football fan who cannot attend a contest in person may watch any number of games on television. This has the great advantage of permitting an *indolent* fan to sit in the comfort of his living room and watch two teams play in the most inclement\* weather. However, some of the spirit, the *gusto*, is missing when one watches a game on a small screen away from the actual scene of the contest. Also, the viewer is constantly exposed to a *garrulous* group of announcers who continue to chatter in an endless way throughout the afternoon. Should the game be a dull one, the announcers discuss the most *banal* bits of information. Even in the poorest game there is constant chatter involving one *platitude* after another about the laudable\* performances of each and every player.

Each Citizen's Obligation

Of all the democracies in the world, the United States has the most lackluster record when it comes to citizen
participation in elections. Every four years the experts try to analyze the reasons for voter Often the eligible voter turnout at election time falls below 50%. This, after months of political campaigning, including televised debates, is a situation.
No matter how hard the candidates woo the voters, the end results are often disappointing. Are the voters so  that they would rather stay home watching television than cast a ballot? Does the voter feel that the
candidates are stating one 4 after another and is therefore turned off?
The right to vote is so precious that revolutions have taken place where it has been denied. The civil rights struggles
of the past were sparked by those who had been denied this right. The greatest country is said to be the failure of citizen participation in the election process.

The man who best described the now *extinct* life aboard a steamer on the Mississippi River is Mark Twain. Having actually worked aboard the river boats, his writing captures the tranquil\* or turbulent\* events of those days. In his book about life on the Mississippi, Twain recalls the *idyllic* times when man was not in such a great rush to get from one place to another. One chapter deals with the races conducted between the swiftest of the boats. When a race was set, the excitement would *galvanize* activity along the river. Politics and the weather were forgotten, and people talked with gusto\* only of the coming race. The two steamers "stripped" and got ready; every *encumbrance* that might slow the passage was removed. Captains went to extremes to lighten their boats. Twain writes of one captain who scraped the paint from the *gaudy* figure that hung between the chimneys of his steamer.

### The John J. Roe

Mark Twain's boat was so slow no other steamer would *condescend* to race with it. With the utmost *candor*, Twain comments that his boat moved at such a pathetic\* pace, they used to forget in what year it was they left port. Nothing would *mortify* Twain more than the fact that ferryboats, waiting to cross the river, would lose valuable trips because their passengers grew senile\* and died waiting for his boat, the *John J. Roe*, to pass. Mark Twain wrote in a *jocose* manner about the races his steamer had with islands and rafts. With quiet humor he continued to *malign* the riverboat, but his book is replete\* with love for this sort of life.

### The Riverboat Pilot

The riverboat pilot was a man considered *omnipotent* by all. Mark Twain once held that high position. He writes that he felt at the zenith of his life at that time. Starting out as a fledgling pilot's apprentice, he could not abjure\* dreams of the time he would become, "the only unfettered and entirely independent human being that lived in the earth." Kings, parliaments, and newspaper editors, Twain comments, are hampered and restricted. The river pilot issued peremptory commands as absolute monarch. The captain was powerless to interfere. Even though the pilot was much younger than the captain, and the steamer seemed to be in imminent\* danger, the older man was helpless. The captain had to behave impeccably,\* for any criticism of the pilot would establish a pernicious\* precedent that would have undermined the pilot's limitless authority.

### The Double Cross

Many incidents that took place aboard his ship are re-told by Twain. One has to do with a wealthy cattle man who was approached by three gamblers. The cattle farmer had let it be known that he had a great deal of money, and the gamblers were trying to *wheedle* him into a card game. He protested that he knew nothing about cards. His *rustic* appearance confirmed that fact. On the last night before landing the three gamblers got him drunk. When the first hand was dealt, a *jubilant* expression came over his face. The betting became furious. All of the proper *decorum* was put aside, and ten thousand dollars soon lay on the table. With the last wager one of the gamblers showed a hand of four kings. His partner was to have dealt the sucker a hand of four queens. At this point the victim, the *charlatan*, removed the veneer\* of respectability, and showed a hand of four aces! One of the three professional gamblers was a clandestine\* confederate of the "rich cattle farmer." They had been planning this duplicity\* for many weeks.

Cross My Palm with Silver

People are fascinated by those who say they can predict the future. Fortune tellers continue to attract gullible

customers, and horoscopes are examined daily to see if there is something \_\_\_\_\_\_ to worry about in the day ahead. One specialist who seems to have found a way to predict something of our future is the palm reader. It is her belief that a long "life line" in the hand means the customer will enjoy longevity.

While this appears to be a \_\_\_\_\_ way to predict long life, a study done in England measured "life lines" of 100 corpses and came up with \_\_\_\_\_ support for the claim: the length of life matched the length of line. The longer the line, the older the person lived to be.

However, there are scientists who with believers in this apparent connection. The "life line" of older people is longer only because the hand becomes more wrinkled with age. Length of line is a of length of life, not the reverse, say scientists.

# The Language Machine

Those who see the spread of automated machines as a nefarious\* force out to usurp the proper functions of mankind have corroboration\* for their belief in the language machine. The *paltry* handful of expert translators with a profound\* knowledge of many foreign languages leaves a wide gap in our sources of vital information. With important technological and scientific work being done abroad, it is difficult to condone the situation. A machine may be set to treat a foreign language as a coded message that it can analyze and put into English. Perhaps it will not do an impeccable\* job, but it will permit the translation of even the most trivial foreign reports and writings. As bizarre as it might seem, machines are taking over as translators in ever increasing numbers.

A Formidable Opponent
One of the most interesting tests of a computer's ability to "think" occurred in 1992. The world's chess champion, a
man of mental ability in this sport, was challenged to compete against the most powerful computer
programmed to play chess. The question was, could a machine a human's place as the best chess player in the world?
The match took place before hundreds of chess enthusiasts and was recorded on film. While the computer lacked the
champion's experience and emotional capacity, it worked with such that it could search ahead for many thousands of choices, well beyond what any human could envision. In fact, the computer had already defeated
many 4 chess masters in preparation for the contest.
The result of this test match was as far as human self-esteem was concerned. The champion won fairly easily. However, there is almost total agreement that it is only a matter of time before we have an electronic chess champion, one incapable of making a blunder. At that point it will be checkmate for all of us.

With the trivial* sum of five dollars in his pockets, Robert Lacy was feeling far from <i>complacent</i> about the future. In fact, it was his <i>somber</i> estimate that no matter how frugal* he was, his money would run out before the next day. He owed \$3.50 in debts to friends; with the remainder he would have to eat enough to maintain his strength. Hunger would <i>debilitate</i> him to the point where he could not continue his fervid* search for Evelyn. There was no hope of an <i>impetuous</i> stranger suddenly thrusting money upon him. Good Enough to Eat?

There seems to be universal agreement that exposure to the ultraviolet light from the sun is deleterious to one's health. Also, except for tobacco industry spokesmen, there is no dispute about the damage done to us from cigarette smoke. What is shocking is the fact that almost everything we once regarded as either beneficial, or harmless, soon gets challenged by scientists. We are urged to \_\_\_\_\_\_\_\_ foods that have high fat content. There go butter and cheese. Even milk has now been added to the list of foods of which we must be \_\_\_\_\_\_\_.

Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.

Women in the Ring

What sport requires the timing of tennis, the energy of aerobics, the stamina of cross-country running, and the physical contact of football? The answer is: boxing. And now that seemingly male spectacle is attracting women.

What was once viewed as \_\_\_\_\_ brutality has been transformed in gymnasiums across the country into the latest form of workout, weight reduction, and energy stimulator.

To suggest that women should not expose themselves to the sharp jabs and powerful uppercuts of boxing because they are the "weaker" sex is 
\_\_\_\_\_\_\_\_. Properly trained by experts, in good shape from punching bags and jumping rope, women can be as \_\_\_\_\_\_\_ in the ring as men.

With women jockeys, race car drivers, hockey goalies, and basketball players, it would require a man with

\_\_\_\_\_\_\_ prejudice, if not sheer ignorance, to argue that boxing is solely a man's sport. Anyone who is

\_\_\_\_\_\_ with the status of liberated women need not be surprised by their entry into the ring.

Modernizing a Parable\*

Thurber punctures in an incisive\* way the platitudes\* that come from stories handed down through the generations. These old saws are accepted by everyone. One such tale is about a tortoise who had read in an ancient book that a tortoise had beaten a hare in a race. The sage\* old tortoise construed\* this story to mean that he could outrun a hare. With *equanimity* he hunted for a hare and soon found one. "Do you have the *effrontery* to challenge me?" asked the incredulous\* hare. "You are a *nonentity*," he scoffed\* at the tortoise. A course of fifty feet was set out. The other animals gathered around the site\*. At the sound of the gun they were off. When the hare crossed the finish line, the *flabbergasted* tortoise had gone approximately eight and three-quarter inches. The moral Thurber draws from this *debacle* for the tortoise: A new broom may sweep clean, but never trust an old saw.

Things Have Changed							
Thurber modernizes an old story that everyone has read or heard. It has to do with a nefarious* wolf who kept a vigil* in an ominous* forest until a little girl came along carrying a basket of food for her grandmother. With alacrity,* this <i>vivacious</i> youngster cold the wolf the address to which she was going. Hungry and <i>gaunt</i> the wolf rushed to the house. When the girl arrived and entered, she saw someone in bed wearing a nightcap and a nightgown. While the figure was dressed like her grandmother, the little girl surmised* with only a perfunctory* glance that it didn't have the old lady's <i>mien</i> . She approached and became cognizant* of the <i>hirsute</i> face of the wolf. She drew a revolver from her purse and shot the interloper* dead. Thurber arrives at a moral for this story that anyone would find difficult to <i>refute</i> : It is not so easy to fool little girls nowadays as it used to be.

# Another Surprise

Thurber's stories are written in a jocose\* manner, but they contain enough serious matter to make one *pensive*. He tells of some builders who left a pane of glass standing upright in a field near a house they were constructing. A goldfinch flew across the field, struck the glass and was knocked inert.\* He rushed back and divulged\* to his friends that the air had crystallized. The other birds derided\* him, said he had become irrational,\* and gave a number of reasons for the accident. The only bird who believed the goldfinch was the swallow. The goldfinch challenged the large birds to follow the same path he had flown. This challenge served to *whet* their interest, and they agreed with gusto.\* Only the swallow abjured.\* The large birds flew together and struck the glass; they were knocked into a *stupor*. This caused the astute\* swallow to *wince* with pain. Thurber drew a moral that is the antithesis\* of the *cliché* we all accept: He who hesitates is sometimes saved.

Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.

Beam Me Up, Scotty

In 1966 a television program appeared that quickly established itself as the most successful science fiction series, moved on to become six popular films, and continues in reruns to be seen somewhere in this country every night of the year. This original series, *Star Trek*, became so popular that there are huge fan clubs across the country and the stars of the original series are mobbed when they make personal appearances.

What makes this form of science fiction so popular? Some may say that each story of the future is a
showing us our own world through a presentation of other worlds. There are those who would 2 this
analysis and argue that it is the odd characters, the 3 aliens, who attract us. We watch with
as worlds battle, knowing it will turn out well in the end.
After many years and many TV episodes and movies, "Star Trek" and its successors continue to our appetite and bring excitement to our screens. As long as space remains an almost total mystery, the unexplained will capture our imaginations.

#### A Lady Novelist

The nineteenth century saw the woman novelist attain the same prestige\* as men. England was prolific\* in producing women writers. One of the foremost in this *genre* was Charlotte Brontë. In *Jane Eyre* she presented a *candid* portrait of a woman caught up in a clandestine\* affair with a married man. Miss Bronte's readers were engrossed\* in this story. She took this *unsavory* subject and presented it in a way that did not *degrade* the relationship. She showed that true passion can be healthy. Miss Brontë did not disparage\* Jane's feelings or besmirch\* her character. The author was generous in her verdict. The affair was considered merely a *venial* sin because Jane was never false in her feelings or her actions.

14921992
We are all aware that 1992 was the year during which there were reminders that it marked the 500th anniversary of Columbus' arrival in this part of the hemisphere. Along with the celebrations and historical reenactments, there was controversy regarding the lives of those who had been here for many centuries before that fateful event.
Historical research shows that it would be extremely to believe that "civilization" began on this continent with Columbus' arrival. The Native American tribes had formed nations and had come together in an
organization known as the Five Nations. They had regulations for governance that were the of self-rule and that became the models on which our Constitution was partly based.
It was to remove the portrayal of the Native American as savage and wild that historians adopted
1992 as the year to 5 them in their true light as members of civilizations worthy of study and respect.

The Good Life	2			
Thoreau's book about the <i>austere</i> but happy life at Walden Pond propagated* his fame around the world. He built a small hut and began living an ascetic* existence. He found it to be a <i>felicitous</i> experience. In this idyllic* setting he was able to spend his time reading, studying nature, writing, and thinking. Far from being indolent,* he kept busy in many ways. At the end of the experiment he recalled the <i>halcyon</i> days with pleasure. He believed he had learned the secret of the truly happy life. The only <i>tenable</i> way of life is one in harmony with nature; material possessions are <i>superfluous</i> .

#### The Mind's Secrets

The study of the human mind and behavior has had many prominent practitioners, but no one is more revered\* than Sigmund Freud. An Austrian physician, he is said to be the father of psychoanalysis. He taught that man has a subconscious mind in which he keeps repugnant\* memories that come to the surface surreptitiously\* and *motivate* behavior. Man often tries to *rationalize* his actions, when, in reality, they are really the result of suppressed memories coming to the surface. Freud's approach to the disturbed person was to attempt *therapy* by examining the dreams that make cognizant\* what the cause of the illness might be. Only with the airing of deleterious, buried emotions can the person move from the *nascent* stage to that of full health. Freud was considered an *iconoclast* in the field of psychology when his ideas first appeared at the beginning of the twentieth century.

The ideas of Freudian psychology have become part of our everyday life. Our language is replete\* with clichés\* that have their origin in Freud's writings. There is a surfeit\* of amateur psychologists who, with celerity,\* analyze an individual's problems from the slightest evidence. Despite their dubious\* education and training in this field, they discuss symptoms and cures on a most *erudite* fashion. Should a person express a fear of height, this phobia is examined; events from childhood are considered germane to the problem. Is it possible he or she was dropped as an infant? Perhaps something in a dream is pertinent\* to explain the feelings of vertigo that accompany height. For some reason, non-trained people find the Freudian approach to the workings of the human mind most conducive to their practicing as amateur psychologists.

Make My Ostrich Burger Well Done
Just about 100 years ago, there arose an industry in the state of Arizona that seems very odd to us today. We know
of cattle ranches and sheep ranches, but would you believe ostrich ranches? This business
became popular as women found ostrich feathers a addition to their wardrobes.
Ostriches are easy to raise. They eat and drink less than cattle, and their eggs are large enough to feed ten people!
During the 3 days of ostrich ranching, feathers were sold for as much as \$300 a pound, so it is easy to see why that business was so attractive.
However, women's fashions changed after World War I, and the market for ostrich plumes fell. Growers had to
a shrinking market. The price tumbled to about \$10 for a bird. As ostrich feathers became
(5) in the fashion world, ostrich ranching came to an end.
Interestingly enough, ostrich ranchers may be coming back into vogue because nutritionists tell us that ostrich meat is low in cholesterol. We may not go wild over the feathers, but pass the lean meat, please. Hold the mayo, too.

Once the fashion industry has been able to foist a new style on the teenager, the older generation tends to stigmatize it as some form

of rebellion. What is often ignored is that the young consumers *capitulate* to what is originated\* by someone outside of their group. The feelings of individuality and *audacity* that the teenager gets from a new style of dress result from the propensity\* of their elders to disparage\* them. The actual situation is that the clothing fashions soon become accepted by all; there is nothing upsetting or revolutionary about them. While people are becoming complacent\* about the "new," the clothing industry is busy planning how to *tantalize* the teenager with next year's "fashion." This arbitrary\* decision is guaranteed to foment\* consternation\* among adults once again in the following year.

To the derogatory\* comments from the older generation the teenagers might *retort* that new fashions and styles are adopted by the elders with alacrity.\* Though they complain, women emulate\* their daughters by shortening or lengthening their hems. They may appear *reticent* about the bother and expense of altering their wardrobe, but they give *tacit* approval to the change by rushing to the department stores where they jostle\* each other to buy copies of the more expensive dresses. The conclusion one might reach after observing how women countenance\* the arbitrary\* changes year after year is that they are naïve\* or victims of some *chicanery* practiced by the clothing industry. Fair Play!

Recently, there has been an attempt to improve Captain Bligh's tainted\* image. Historians maintain that there was no *turpitude* in Bligh's actions aboard the H.M.S. *Bounty*. Perhaps he was imprudent\* in failing to keep his temper under control. While an *infraction* aboard ship was quickly criticized, Bligh never carried out those *callous* actions the movie dramatized in order to depict\* an evil man, say his defenders. After the mutiny, Captain Bligh astutely\* navigated the lifeboat with the other 17 men for over 3,000 miles to safety. This prodigious\* feat alone, say those who would restore Bligh's good name, should be enough to allow for a full *redress* of the wrongs that have been blamed on him for over 150 years. Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.

Psst . . . Need World Series Tickets?

Think about this for a moment. Is there anything wrong in buying something for one dollar and reselling it for two
dollars? Naturally, you would be correct if you saw nothing amiss with this transaction; it's the way a capitalist
economy works. But, if you bought a ticket to a rock concert or baseball game for ten dollars and sold it for twenty,
you would be committing an of the law. You might ask, "What's so about this?" The answer is that you would be guilty of the practice known as "scalping." Does an individual who offers a scarce
ticket at a price above the original price deserve the 3 connected with the word "scalping"?
These hard-working and risk-taking individuals see themselves as go-betweens in a world where people are willing
to spend additional money for a popular event. However, law enforcement officials remain 4 in the
face of all reason as they arrest and fine these enterprising salesmen. Those believers in punishing law-breakers find nothing wrong with trying to halt the scalping of tickets. For others, it is a way of doing business that they claim hurts no one and is in keeping with a profit-driven economy.

Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.

In Thailand, Mum's the Word

In this country we take for granted our right to speak out about our elected officials in any way we wish, without fear of arrest or imprisonment. The most disrespectful language is allowed. While some may take at an insult against the president, our Constitution protects that right.

Now, consider the country of Thailand. That land in southeastern Asia is ruled by a king. What happens to an

individual who fails to 2 \_\_\_\_\_ this monarch? There is a case of a person who joked that if he were king he

could sleep late every day and drink wine in the afternoon. For this somewhat \_\_\_\_\_ remark, he was sent to prison for seven years. She said "it" instead of "the

king's photograph" and for this 4 \_\_\_\_\_ alleged insult, she also was sent away for seven years.

While some U.S. citizens may 5 \_\_\_\_\_ our leaders, in Thailand the less said the better.

Queen of the Superm	narket			
The American housewife is queen of all she surveys in the supermarket. She decides what items shall be purchased. Grocery manufacturers are well aware of her power to make one product a success and another a failure. They spend huge sums developing new products with which to <i>curry</i> her favor. Fearful that a successful product will soon begin to <i>pall</i> , the manufacturers, without cessation,* come out with "new and improved" versions to whet* her appetite. ### It's What's Outside That Counts

Packaging of grocery items is a facet\* of advertising that is too little appreciated by consumers. Walking up and down the aisles of a supermarket, one seldom stops to analyze the individual package in the *potpourri* of items on the shelves. The manufacturer had to glean\* and test many different designs before he accepted the one you see in the array\* before you. Before he will *sanction* the use of a particular can, box, or bottle, he must know many things about its efficacy.\* He wants to know if the colors attract: a white box may *denote* cleanliness, a red one, strength. There may be a photo or a drawing that will *allude* to the product's use or special qualities. A lackluster\* package may be fatal.\* Next, the size and shape are important elements. The housewife may want a small package for easy storing, but a larger package may suggest economy. A round bottle may look attractive, but a square one is easier to stack. These are some of the *insidious* aspects of packaging, the main purpose of which is to attract your attention as you peruse\* the crowded supermarket shelves.

Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.
Age Discrimination
One of the most forms of discrimination is that based upon age. We have become aware through publicity and education that bias and discrimination based upon race, color, creed, and sex are not to be accepted. Through laws passed by the Congress of the United States and by individual states, we agree that using these criteria for hiring, promoting, or firing in the workplace is a and undemocratic excuse. Many lawsuits have supported this most basic right to "life, liberty and the pursuit of happiness" protected by our Constitution.
Why is it, then, that so few question the of preventing those viewed as "too old" from getting positions, or, if already on the job, promotions? Advanced age also leads to the firing of such employees and their
replacement with younger applicants. Is there something in youth that suggests that older workers cannot do the job as well? Until age discrimination goes the way of all of the other forms of prejudice, we may
continue to 5 the reasoning that "younger is better."

# You Can't Help But Watch

The consumer is in a *quandary* about making a felicitous\* selection among the array\* of products. The advertisers must influence the malleable\* consumer, and often they do it in the most *callous* ways. Television offers many tangible\* advantages for reaching the consumer. As a result, the consumer is inundated\* by commercials. The advertiser knows that a television commercial is the most *expedient* way to reach large numbers of people. The cost for each commercial film is prodigious,\* but because the audience is so large, the cost per viewer is *negligible*. Each commercial is prepared in the most meticulous\* way in order to catch the attention of even the most *blasé* viewer and hold it until the message is through.

The reintroduced "new word" should have stood out immediately. Did it? It's callous, of course.

## Sample Sentences

## Going to the Source

The wide diversity\* of reasons people have for buying one product rather than another are investigated by the advertising people in order to prepare efficacious\* commercials. They do not have the slightest *qualm* about questioning the consumer about personal things in her own domicile.\* The consumer is requested not to *expurgate* her answers. Generally, people are not reticent\* and do not *begrudge* giving the time and effort. The questions delve rather deeply, and what the *artless* responses divulge\* will help the advertiser decide what to put into his next commercial. After a large number of interviews, the copious\* results make it feasible\* to prognosticate\* how well the commercial will do. The interviewer usually offers no *gratuity* to the person who has helped, but often a sample of the product is proffered\* as thanks.

## It Seems to Work

Despite the antipathy\* toward commercials expressed by the viewers, the remarkable success of television commercials in selling products makes it *manifest* that the advertiser has gleaned\* what the viewer wants to see and hear from his research interview. This has helped the advertiser *delve* deeply into what motivates\* people when they go into the supermarket to purchase products. The advertising agency is never *capricious* and can vindicate\* spending large sums of money on research. Having uncovered what the public wants, the advertiser expedites\* putting the *requisite* words, music, and photographs of the product on film. He will thus *replenish* the never-ending, ubiquitous\* television commercial supply in the hope that the consumer will remember some facet\* of the film and buy the product.

An Historic Date
One event that takes place so rarely that almost no one alive when it happens can remember the previous occurrence
is the changing of the century number. The passing of the number of years brings about the end of
the 20th century and the advent of the 21st. Is there anyone enough to reach this historic date without experiencing the excitement of this once-in-a-lifetime moment?
While we may feel that events in our lifetime happen in a 3 way, the stroke of midnight on
December 31, 2000, ushered in a new century. It served as a time to reflect upon the of events in our lives, both positive and negative, that the 20th century encompassed. It is obvious to all that the past 100 years have altered the world in ways no one could anticipate at the end of the 19th century. There are many who
into the past and make predictions for the new century. December 31, 2000, was a time for reflection and promise.

### Doing the Right Thing

The obstacles that frustrate\* the physically handicapped person who is seeking employment may turn him into a *cynic*. Too often a prospective employer, with a rather *unctuous* manner, actually tends to degrade\* the handicapped by proffering\* employment that is really beneath them and their abilities. The employer appears to be acting in a *benevolent* manner, but this attitude shows no compassion,\* for he really expects the person seeking the job to remain *subservient*. This *iniquity* cannot but give the handicapped a feeling that they are being discriminated against. He does not expect a sinecure,\* but he has an aversion\* to the prevalent\* belief that he should consider himself lucky to find any employment.

Why is there any question about the propriety* of hiring the physically handicapped? No one who understands their needs can condone* this attitude. The offering of employment should not be considered a <i>largess</i> . There should be no need to vindicate* the hiring of a handicapped person. The only <i>criterion</i> should be what he is capable of doing. If this is the approach, the handicapped worker will not feel he is an encumbrance* to his boss. The employer, on the other hand, will find it conducive* to good work and will not <i>repent</i> his having tried something new just to <i>mollify</i> his conscience. ## Whistle Blowing

There appears to be a question of how much loyalty employees owe to their employerswhether private or governmental. Many companies go out of their way to encourage employees to make suggestions that will improve the way they exercise A. O appleves will not criticize or reprimend an employee who points out

the way they operate. A \_\_\_\_\_ employer will not criticize or reprimand an employee who points out problems having to do with the way other employees are harming the business. In fact, it should be in the bosses' interest that the person who has become known as a "whistle blower" is encouraged to alert them to a problem.

However, many such whistle blowers face harsh punishment for calling attention to illegal or unethical actions. The whistle blower soon becomes a \_\_\_\_\_\_ in the workplace. Under the \_\_\_\_\_\_ of some minor error,

## The Island of Wild Dogs

The saga\* of the introduction of that *diminutive* song bird, the canary, into the homes of the world as tame pets is an interesting one. In the sixteenth century a trading ship going to Italy stopped at an island named "Canis," from the Latin word for wild dog, which could be found there in *profuse* numbers, off the coast of Africa. The *dulcet* song of the wild birds whetted\* the interest of the captain. In *impromptu* cages hundreds were taken aboard to be traded. The sailors called these gray-green birds, spotted with yellow, "canaries." As they approached the island of Elba, near Italy, a *malevolent* storm put the boat in jeopardy\* of sinking. A member of the crew released the birds, and the intrepid\* canaries instinctively flew towards land. The peasants on Elba took the wild canaries in as pets. Eventually, the birds found their way into homes throughout Europe where they were domesticated and bred for variety of song and shades of colors. The canaries prevalent\* today differ greatly from the ones discovered over four hundred years ago.

Using the clues listed below, fill in each blank in the following story with one of the new words you learned this week.

# Reprieve for Wolves

One of the most difficult problems to resolve has to do with the conflicting interests of environmentalists and profit-making businesses. Examples of this dilemma appear frequently. While the dispute about cutting down a forest to preserve owls has been in the news, there appeared another conflict in the state of Alaska. Hoping to increase the number of tourists who seek to hunt deer and caribou, the State of Alaska ordered the killing of some of the

number of wolves who prey on those animals.
This resulted in a of letters and articles condemning the that would result from the anti-wolf policy. So, once again, the environmentalists, who maintain that the natural balance should not be interfered with, ran up against the Alaskan tourist industry, which wants to attract hunters who will increase the
state's revenue. After much publicity about the wolf hunt and articles that tended to 4 this policy,
Alaska decided to 5 the proposed action.

Henry VIII and British History

Students in the United States should consider themselves lucky when it comes to studying the country's history. The

United States has been a nation for approximately 225 years. We would be \_\_\_\_\_\_ if we had to learn as much history as students in Great Britain, for their history goes back some 1,000 years! In that time England has had many interesting and unusual rulers. One who has fascinated us is Henry VIII. Ruling some 450 years ago, he

became well known because of his many marriages and his \_\_\_\_\_ for doing away with some wives who displeased him.

In physical appearance he was unattractivehe was large and \_\_\_\_\_. When his first wife could not bear him a son who would be heir to the throne, he divorced her. This caused a break with the Pope who refused to recognize

the divorce. Henry VIII sent an 4 \_\_\_\_\_\_ to the Pope and renounced Catholicism. He then married Anne

Boleyn but decided to her after quickly tiring of her. His third wife died in childbirth, and he divorced his fourth. His fifth, Katherine Howard, was also beheaded. Only his sixth wife was able to live on after Henry's death in 1547. From this brief history of only one English ruler, it is easy to imagine how much an English history student must learn in order to prepare for an exam. In Henry VIII's case, one would have to get a "head start."

#### A Battle for Power

The Inca emperor *derived* his prodigious\* power and authority from the gods. The paramount\* god was the sun god. It was from him the ruler passed on his *prerogative* to rule to his most astute\* son. This *nepotism* had worked with great efficacy\* for centuries. The land holdings were immense;\* there were rich farmlands and llamas and alpacas for wool. Precious metals were plentiful: silver, copper, bronze, and the most sacred of all, gold. This metal resembled the sun god whom they extolled.\* There was no *dearth* of idols and ornaments hammered from this gleaming metal. There was always more gold coming from the mines to replenish\* the supply. At the acme\* of his power, the Inca ruler died without naming the requisite\* successor. In 1493 two sons began an *internecine* struggle for control. For the next 40 years the empire sank into the lassitude\* caused by civil war.

## A Perfidious\* Conqueror

The feuding between the rival sons reached its pinnacle\* in 1532; at that moment Francisco Pizarro came onto the scene. A native of Spain, he was sojourning\* in Panama when he heard of the riches to be found in that far off land. Overwhelmed with cupidity,\* but still a *tyro* when it came to wresting\* power and wealth from hapless\* people, he joined with an inveterate\* adventurer. They gathered a small band of mercenaries.\* The first two attempts failed, and Pizarro returned to Spain to request authority and money in order to conquer the West Coast of South America. Whether by *sophistry* or cajolery,\* he was given the requisite\* aid. With a force of 180 men, the dregs\* of society, he invaded Inca territory. He reached the city where the current ruler, Atahualpa, was holding court. The Incas welcomed Pizarro who, in a *factitious* display of friendship, heaped *encomiums* upon Atahualpa. Unknown to the Incas, Pizarro had brought guns that were still beyond the technology\* of these people. The *obloquy* of his next act, ambushing the Incas and taking Atahualpa prisoner, will live in the history books that are replete\* with tales of conquest.

#### The End of an Empire

The Machiavellian\* Pizarro held the captured Atahualpa for ransom. He was adamant\* about receiving a room filled with gold to the height of a man's shoulder. This was taken as a *hyperbole* at first, but Pizarro knew the gullible\* Incas would be *munificent* when it came to rescuing their sacred ruler. They did not procrastinate,\* and a frenetic\* collection of gold took place. Pizarro, to whom *prevarication*\* was natural in dealing with the Incas, had no qualms\* about executing their ruler as soon as he had the gold. The Inca empire was moribund,\* but the *charisma* that surrounded Atahualpa was such that, after his death, the Incas fought on tenaciously\* in his name for several years. Eventually, superior weapons quelled\* all opposition. A policy of *genocide* was adopted by the Spanish conquerors, and almost two million of these proud people died in the carnage\* that followed. The saga\* of an ancient civilization thus came to an end.

### The Panorama of Words

Prepared especially for the Fourth Edition, this new section, in which you will find the 1100 words in sources as strikingly disparate as the *Toronto Globe & Mail*, Truman Capote, William Shakespeare, Agatha Christie, Thomas Mann, *TIME*, Machiavelli, and Tom Clancy, validates the contention that this selected group of vocabulary words has been widely used by educated writers.

Most issues of your local newspaper, for example, will contain at least a dozen of the words you have encountered in these pages. But they also appear in advertisements, obituary notices, weather forecasts, cartoons, and brochures of all sorts. Wherever else you come in contact with adult vocabularyradio and TV shows, news broadcasts, college entrance exams, movie scripts, booksyou are likely to find more than a few of the words in 1100 Words You Need to Know.

Now, for a useful summary of what you have learned in the forty-six lessons, read through "The Panorama of Words," noting the varied sources of their usage. Be aware that some of the following quotations have been adapted or edited for brevity.
