Part 1

1. HOME/ ACCOMMODATION

What kind of housing/accommodation do you live in?

I live in a terraced house that has a living room, a kitchen, three bed rooms, two bathrooms and a lovely back garden. It's not really a spacious house, but it's just right for me and my family.

Who do you live with?

I live with my parents and my siblings. We always get on well with each other and have a lot of fun.

How long have you lived there?

I've lived there since I was a child, until I graduated from high school and moved to the city to enroll at university, where I lived in a student dormitory during the semester.

(If you answer you haven't lived there long)

What's the difference between where you are living now and where you have lived in the past?

Living in a dorm with other roommates is totally different from living in my own house.

My current residential area is quite small and it's very noisy because there are a lot of people there and I don't have my own space. Conversely, when I was living at home, I had my own spacious room and it made me feel comfortable.

Do you plan to live there for a long time?

To be honest, I intend to buy an apartment in an urban area after I graduate from university.

I can decorate and design my ideal home with whatever facilities I want.

Which room does your family spend most of the time in?

It's definitely the kitchen. Not only lunch or dinner time but all our family reunions take place in the kitchen where all the family members get together to eat tasty meals, and chat to each other – it's a really harmonious atmosphere.

Are the transport facilities to your home very good?

To be honest, most of the transport facilities to my place are not very modern. The bus service from my work place to home is irregular and usually overcrowded.

Do you prefer living in a house or a flat?

I prefer living in a house to a flat because I value my privacy and need my own space. Owning an independent house, I can plan and design a house layout to suit myself. Moreover, I can modify a house according to the size of the family.

Please describe the room you live in.

My current room is actually more like a bedsit. It is a multi – purpose room, I use it to sleep and study as well. It is painted in pink, that's my favorite color with a bed, a cupboard and desk. It's not really spacious but it's just right for me.

What part of your home do you like the most ?

I prefer my bedroom most due to its convenience and privacy. Because of my stressful work I want to be in a quiet place and concentrate on my work. In my own room, I'm never disturbed by anyone else.

Moreover, in my own space I can do whatever I want without bothering others.

How long should people sleep for the benefit of their health? Why?

It is celebrated annually, which frequently falls in the middle of March. (Why you had this event)

Well, the event includes a wide range of activities, which cater for students of different interests, preference and talents. Most activities involve team work, which is great to **strengthen** established friendships and also to develop new friendships by connecting with students in other classes. The most exciting part was the sale of our own products during the first morning, which was quite **chaotic** and even competitive, as all of us had to entice as many customers as possible. Therefore, apart from creative marketing, we also sang or dance flashmobbed to captivate the crowd, which gave us a lot of pleasure in the end. As I see it, this event really provided a **communal** living environment and provided new experiences through which students develop **self-management** skills and interpersonal skills.

He'd been doing it for about six months and I had asked him about it once as I was curious whether mountain climbing requires a lot of **stamina**. At that time, I wanted to **get away from it all** and preferred going somewhere **off the beaten track**. I accepted his request **without hesitation** and even bought some suitable clothes for this activity. It was great fun, although I was a little scared at first, **apprehensive** to be exact, my special instructor was really experienced and I started practising on the ground and very low on the wall to gain my confidence so there was very little risk. However, the reality did not seem that easy, as the route to reach the mountain peak is **in twists and turns**, we almost felt the terminal point was approaching but it was endless. I got a little exhausted and had to lean against a tree. My friend encouraged me to hold on, take a deep breath and only think about the mountain peak to continue to climb.

(And explain why you think it is a challenge)

Well, first of all, it was a completely new and somehow **adventurous** experience for me. Climbing a mountain is as similar as overcoming each obstacle in your life to eventually fulfill your ambitions. I'm going to talk about an occasion on which I got to see elephants. I have had the chance to see a lot of animals **with my naked eyes**, but the most intriguing one for me are intelligent elephants. It was last summer when my whole family had a trip to Ho Chi Minh City, and we decided to visit the city's renowned zoo, Thao Cam Vien. It was ranked eighth among the oldest zoos in the world. (What it did)

I got the chance to see a group of elephants swimming, which is quite unexpected for me as

I didn't know that they have this ability. Elephants move all four legs to swim and are able to move quite fast. Their big bodies provide enough flotation while the trunk acts like a **snorkel**. Most often, crowded places are public venues that attract a great number of people. **Megacities** like New York, Beijing, and Tokyo are known for being **exceptionally** crowded. Photos of **massive** crowds of people depict these cities' residents doing everything from walking down the street to marching in parades and even sitting in traffic. My experience at a crowded place was in one of these cities, Tokyo.

(Who you went there with)

Last month, my family decided to choose Tokyo as our **holiday destination**. Tokyo is Japan's capital and the world's most **populous** metropolis. Today, Tokyo has become one of the world's most active major cities, home to **cutting-edge** technology, information, culture, and fashion, as well as a high level of public safety.

(Why you went there)

Visiting Tokyo has always been one of my biggest travel dreams. It is a modern, fast-paced city that still **embraces** its traditional roots. Even though the city is large, there's a sense of cleanliness and order about Tokyo that makes it extremely accessible to visitors.

(And how you felt about it)

There are many things to talk about the once in a life time experience in Tokyo. Perhaps best of all is its structure: lacking a clearly marked center, it's made up of a **patchwork** of different neighborhoods, each distinct in identity and atmosphere. "Animated" is perhaps the best word to describe Tokyo. The most crowded place must be Shibuya crossing, the biggest and busiest crossing in Tokyo, where sometimes 1000 or more people cross the **intersection** at once. My family also experienced Tokyo's crowded trains during rush hour once, and the **commotion** was so bothersome. Apart from its overwhelming number of people, I have nothing to complain about this city. Indeed, I am particularly impressed with the **civility** and orderliness of the people here.

Describe a time when someone apologized to you

Who this person is

Why he or she apologized to you

How you felt about it

(When it was and who this person is)

Apologizing is a part of good manners and I believe that it helps to **pacify** many **bothersome** situations happening in everyday life. In several events, others have apologized to me but

the apology from my closest friend, Linh, was the most significant to me. This happened a few months ago, my father presented me with two movie tickets, as an **incentive** to achieve a full-scored performance in the English exam. The compelling trailer of this movie captured my attention right away and I knew that I should enjoy it with my bestie. Unhesitatingly, I decided to invite Linh, and we quickly made an appointment for the cinema before 6pm.

(Why he or she apologized to you)

As scheduled previously, Linh was supposed to show up at the cinema at 5:30, but somehow she did not. I did **give her so many rings**, but she did not answer any of them. I kept waiting until 6 pm, in case she was busy on something else, but **in vain**. **In the heat of the moment**, I **lost my temper** and **furiously** left her a message, saying how disappointed I was with her and asked whether she respected our relationship. A day later, Linh called me and sent a **heartfelt** apology to me. She explained that on that day, her younger brother was disturbed by a serious eating disorder and she had to take care of him at the hospital. Because the incident was so sudden and unexpected, she was too nervous to bring the phone with her and was unable to contact me. Linh hoped that I could understand and **sympathize with** her.

(How you felt about it)

Honestly, I felt a little guilty for being too **aggressive** while knowing nothing about her situation. From this incident, I also understand that everything happens for its own reason. We should not **jump to a conclusion** without careful consideration. Besides, I think a thankyou or a sincere apology is truly an **indication** of respect from the individual for the relationship he or she is in.

(Why it was important)

The reason why it was of great importance is because this educational trip is a beneficial way for student to acquire both knowledge and experience. I remember when notified of this trip, our class together searched a lot of information about the park. Through this trip, we were able to learn more about the importance of forests, the necessity and our responsibility to **alleviate** environmental problems, making the world a better place for all the species and not just for humans only.

It was a **balmy** day with a mild temperature, such perfect conditions for quite an **adventurous** activity like hiking. After having breakfast, I checked my backpack; made sure I was wearing my most comfortable shoes, and took the bus to the foothills.

(Why it prevented your activity)

However, when I reached there, the sun disappeared and the temperature changed **vastly**. The wind had picked up, with dark clouds rolling across the sky. This was no doubt an **indication of a heavy rain** or worse, a big storm. From my previous experience, I knew right

away it is **by no means** an easy task to hike by myself in such conditions, as the mountain road I chose was full of **twist and turns**.

(What you did)

Demotivated as I felt, I had to cancel my hiking plans for the sake of my safety. However, on the way back, I found that there was a hot spring resort by the road, which I had never been to before. I decided to treat myself to a service there to make up for the failed plan.

(And how you felt about it)

Of course, I was **utterly** disappointed initially, because I had been planning this hike for a long time. Yet, the spring resort experience was wonderful itself. I'm going to describe a time when I didn't use the mobile phone. Well, I was not allowed to use it to be correct. I remember during our Math lessons in 12th grade in high school,

the teacher decided to ban the use of mobile phones, considering its **adverse** impacts on students' performance. At first, she wasn't **set in her ways** to impose such a strict rule, however, **on second thoughts**; she believed the total disappearance of mobile phones in the class would be **in the interest of** all students.

(Why you could not use your mobile phone)

Well, our teacher was convinced that such a **gadget** would constantly generate great **distractions** among students during class, and **accordingly**, discouraging their learning spirit. Indeed, this was really the case for many. In my class, those who owned a mobile phone could hardly pay full attention as they were constantly checking their phones for messages and the like. As a result, our teachers found it **worrisome** and disturbing when students were using phones in their class and we ended up not being able to bring cellphones to school at all. If anyone needed to call their parents, they were allowed to use the telephone in a supervisor's room anytime.

(How you felt about it)

Honestly, at that time, the price of mobile phones was **beyond my means**; therefore, only those with money in my class were able to afford them. This rule exerted no effects on me or my studying. 35. Do you think it is necessary to have laws on the use of mobile phones?

(Give a direct answer to the question) Well, this issue is quite complicated. *(Explain your reason or reasons)* From my perspective, cell phone usage should be restricted in public places **for the sake of** the surrounding people. For example, in a nice restaurant, it would be rude to answer your phone and talk to the other person because it would interrupt other peoples' dates or dinners or get-togethers. The walls will be painted in white, which will make my house look a lot brighter and reduce the **absorption** of heat. Also, the doors will all be glass because there is nothing more elegant than glass. I follow the minimalism of the Japanese, and I am lazy, so there will be nothing much inside my house apart from a kitchen, creamy lights, and some very essential necessities. There is no question of paintings or complicated furniture being in my house.

(Where it is) I've dreamed of having a big **detached house** with **spacious rooms** in the resort city of Danang since it was **crowned** the most liveable city in Vietnam, and has won this title for 5 years, **leaving far behind** its rivals such as Vung Tau, which is my hometown, and Ho Chi Minh city, which is the wealthiest city in Vietnam. Danang is such a stunning coastal city with magnificent views of the sea and the mountains. It's natural and modern at the same time, that's why I would love to live there.

People in Vietnam are considered to **give their preference to** private houses due to the overwhelming part of the population **dwelling** in private houses. However, an increasing number of citizens, especially in cities, choose to live in apartments as a result of the population explosion, which has triggered a substantial rise in the prices of private houses.

2. What are the benefits of living in a house?

The first benefit of living in a house is that one can **feel a clearer sense of** privacy as they do not face as much neighbour-**driven** trouble as those living in apartments. Also, it is worth highlighting the extent to which citizens living in their own houses can save money normally spent on different areas such as security or public area cleaning services.

3. Why do many people like to live in the city?

The answer is more than simple - it's convenience. Not only can people enjoy more convenience in terms of shopping and services, but they can also have the chance to send their children to **elite** schools. Among different kinds of small start-ups, Trinh homestay, located in the Mekong Delta, has emerged as one of the most successful ones in the prime age of tourism in Vietnam.

(how you knew about it) As AirBnB, an app which supports homestays, has succeeded in running marketing campaigns and offering lots of deals for both customers and homeowners, it is regarded as an ideal alternative to traditional hotels, which will **cost customers an arm and a leg**. Facebook and Instagram have been flooded with thousands of posts about AirBnB services and some months ago, I **stumbled on** Trinh homestay.

(how it became succesful) An article on CNN **cast a spotlight on** Trinh homestay, helping her homestay gain independence from AirBnB. First, Trinh homestay was just like millions of other homestays on AirBnB, however, Trinh's creativity and ardour for the Vietnamese culture lifted her first homestay out of AirBnB as Trinh homestay expanded. Trinh has built many homestays in other provinces in the Mekong Delta.

(and explain how you felt about it) I believe that Trinh homestay, albeit operated on a small scale, should be an **exemplifier** of the importance of creativity as well as a profound knowledge of the local culture. Also, her success can be attributed to the fact that she alone has built a small **niche business** that caters for culture enthusiasts and **ran her business** on her own during the first days of Trinh Homestay. Other homestays in Vietnam should follow this model using the cultural traits of their own regions to apply to their own homestays, creating an atmosphere that represents the local region's culture right in the place where tourists stay.

(Where you knew him/her) I know Theresa May from the BBC. She is a former Prime Minister of the United Kingdom. She filled the void after her predecessor, David Cameron, **resigned** upon the UK's choice to leave the EU. After all the previous steps, the result was displayed via email. However, the final result from recruitment was informed via text message, which **came as a great surprise to** me.

(Where you helped him or her) Ignoring someone who is in need of help is considered as **the height of bad manners**, I believe. Therefore, I try to give others a hand whenever I can. Helping my classmate to improve his English proficiency has been one of the most successful and meaningful achievements I've ever had in my life. My classmate, John, struggled with every single English test due to his low level of language **command**. It can be said that John's exposure to English was too little for him to have the chance to practice his skills, the reason for which was probably his financial background. I was **assigned** to take the responsibility of tutoring him by the teacher. I usually helped John in cafés. However, sometimes we also went to the parks where there were foreigners for him to practice with.

(Why you helped them) I love helping others. That's the first reason. Another reason is that English has been of great significance to me, so I believe that if John can develop a strong command of English, he will open up a new chapter in his life.

(How you helped them) John and I went to a café each weekend in order to review all the knowledge acquired during the whole week. John offered to treat me but as I could recognise his suffering from hardship, we **reached a consensus** on this and agreed that we would **take turns** to treat each other. During week days, we would go to the park in which an immense number of foreigners jogged so that John could have the chance to practice his listening and speaking skills, as well as **expand his vocabulary**. At weekends, as aforementioned, we would review the phrases he had learned throughout the whole week so that they would be **imprinted on his memory** clearly and always be ready for use.

(And explain how you felt about it) And finally, my belief has **turned out** to be true, at least in the case of John. He emerged as one of the best performers in class. Also, he was able to get a job in this field, which ensured his quality of life and improved his living standards as he was able to **feed** himself at the age of 17. John's

considerable success made me feel more than just happy and proud. This is indeed one of the few things in which I take pride.

(What this person looks like) My family members all have a **diminutive frame**. My younger sister is not an exception. She's only around 1m4 although she has turned 10 years old. She has a lovely complexion and she's always **well-turned out** whenever she goes to church or school. She **bears a striking resemblance to** my mother, who is pretty mindful of appearance.

(What kind of person he/she is) From my description of her appearance and how she cares about her appearance, you can already guess she is good company, like me, as she tries to socialise with her peers at school and church a lot. The number of friends she invited to her birthday party came as a huge surprise to me. She is definitely not a kind of person that would **hide her light under a bushel**, neither is everyone else in my family. She's a bit too confident with her academic achievements to be honest. But I believe that those aforementioned personal traits of hers really suit mine. That's probably the reason why I get along quite well with her.

- What you did in it
- And how you felt about it

(What it was like) Today, I would like to talk about a team in which I found a lot of happiness. Several months ago, I had a chance to participate in a project called TOOP, which stood for Temasek Overseas Outreach Programme. The team included more than 30 students from Temasek Junior College, along with their teachers and 4 other Vietnamese volunteers including me. We were divided into 4 groups and took different responsibilities **in rotation**.

(Why you joined it) I made a snap decision just minutes before the application deadline. I was reluctant to apply to volunteer because I heard that from my friend that his team had been **bouncing off the walls** waiting for the first day of work. However, as the programme intensified, some students showed signs of exhaustion.

Nevertheless, my friend also said they were pretty much responsible as albeit exhausted, they never **swerved an inch from their duty**. So, after being **called for an interview** and offered the voluntary position, I decided to participate in the programme to enrich my experience, learn from Singaporean students and expand my social circle.

(What you did in it) During the programme, I **delivered lessons** for the first time as well as **worked with my hands** on a construction site. I was chosen as one of the Vietnamese volunteers in charge of interpreting as well as helping the Singaporean students prepare their lessons prior to class. The programme lasted from 25th November to 5th December.

(And explain how you felt about it) This was the first time I had joined in such an outreach activity. What turned out was far beyond what I expected. Everyone in my team was so outgoing and hardworking, especially my teammates. Except for critical thinking skills, I believe that my calculation speed also improved lot.

(Whether it is difficult or not)

Honestly speaking, it was not difficult in the sense that my critical thinking abilities developed in the most natural way tpeople can imagine. It is common knowledge that Singapore is famous for its wide coverage of public transportation including bus and railway systems which help both local and foreign visitors travel around the city-state **with ease**.

(What means of transport you took) Apart from that, as a result of the government's policy which imposes a limit on the number of vehicles on the road, a taxi did not seem affordable for those travelling **on a budget** like me. I was left with no choice but to board an MRT train to get to the city centre, which was the fastest and most convenient way, albeit not the most **economical**.

(Who you were with) I commuted with my father, who went to Singapore for a regular checkup at Raffles Hospital, which is one of the most famous healthcare hospitals in the whole of Asia. He was also quite excited about his first time using the metro.

(And explain how you felt about the trip) I was not a frequent public transport commuter at that time, therefore, I thought that the MRT would travel **at a snail's pace** and it would take ages to arrive in downtown. Also, as it was the first time that I had used the metro, I **dreaded** to think that I would board the wrong train and get lost. But the fact that I only had to change the train once and that it only took 30 minutes to get to downtown really **came as a surprise**. Instructions were so clear that I did not even rely on anybody to help me.

2. Which means of transport are available in your country?

My country has long been notorious for its chaotic streets packed with motorbikes. Also, car ownership is increasing pretty fast. Meanwhile, public transportation has not **witnessed much progress** as the whole country is still relying on our 60-yearold **railway network** and struggling to finish its first **metro systems** in Hanoi and Ho Chi Minh city.

3. How expensive is transportation in your country?

I would say it's pretty affordable compared to our neighbours. Car tariffs have been reduced to 0%, which acts as an incentive for people to buy cars. In terms of public transportation, one bus journey, irrespective of distance, only costs 7.000 VND.

4. What may be the difficulties in using public transportation in your country?

I would say that the quality of facilities remains low in the whole of the public transportation system. Also, the quality of service is also low. For example, public transportation does not support disabled individuals and bus drivers are, most of the time, quite rude and **condescending to** passengers.

28. Describe a film/movie you would like to share with your friends

You should say:

What it is

Where you watched it

Who you watched it with

And why you want to share it with your friend

(What it is)

The film that I would love to share with my friend is Parasite, a 2019 South Korean black comedy thriller film directed by Bong Joon-ho. The film stars Song Kang-ho, Lee Sun-kyun, Cho Yeo-jeong, Choi Woo-shik and Park So-dam. It received widespread critical **acclaim** and won the Palme d'Or at the 2019 Cannes Film Festival, becoming the first Korean film to receive the award. It was selected as the South Korean entry for the Best International Feature Film at the 92nd Academy Awards.

(Where you watched it)

I watched this movie in the cinema right on the day it was **premiered**, because I was totally **enthralled** by the mysterious trailer and the unique name of the movie. The experience at the cinema was also **rewarding**, with a huge screen, the super sound-system, the darkened atmosphere, and diverse audience reaction.

(Who you watched it with)

Well, it was my sister who introduced me to this movie, so I enjoyed it with her. We both share an **immense** love for movies with exotic themes and twisting plots, as these excite our curiosity. As expected, the film left an unforgettable impression on us, and we also recommended it to other friends.

(And why you want to share it with your friend)

Well, this movie is just beyond your wildest expectations. Parasite **inveigles** its way into our consciousness. We laughed, at first, at its skewing of reality and the sheer **temerity** of its main characters. But laughter soon gave way to fright and then to **despair**, so I want my friend to experience these very special feelings. Parasite is generally **gripping** and finely crafted, standing up well as Bong's most mature state-of-the-nation statement since Memories of Murder in 2003. I certainly won't give away any spoilers here, but

suffice it to say that you won't guess any of the secrets, and once the story goes down the rabbit hole, it stays very dark till the end.

(Explain why you would like to see it) I just simply think that watching the sky during the afternoon time and contemplating the sunset always brings me excitement and relaxation after a hard-working day. (What the photo is about) Everyone at least takes a picture once in their lives, and of course, I am not an exception. However, there is one picture which **imprinted on my memory** is a group photo in Malaysia with the Petronas Twin Towers in the background. My cousins and I went on a trip to Malaysia last year and we **paid a visit** to Malaysia's biggest pride – the Petronas Towers. The towers used to **notch up** as the world's tallest building before witnessing the strong rise of other skyscrapers. Kuala Lumpur's top tourist attraction and most photographed landmark is located in the heart of the capital city, surrounded by a **cluster** of smaller, but by no means small, skyscrapers. People say that you haven't been to Kuala Lumpur if you haven't got a picture with the towers. I've printed this photo and hung it on the wall in my room.

(Who took that photo) We all wanted to be in the photo. Therefore, we had to get other tourists to take photos for us. I told my cousin who could not speak English at

all to get other tourists to take a photo for us. And what turned out was that she **came across** a Vietnamese one.

(Where you put it at home) Before I printed the photo, I had posted it on social media and to my surprise, it went viral within just some minutes. I **backed up** all the photos on the trip as soon as the trip came to an end so that I can access photos whenever **going online** and prevent them from getting lost in case my phone is stolen. The photo was so special that I decided to print it out and put it right on the wall in my bedroom.

You should say:

- what it is
- what it is used for ? how it is made/produced and explain why your country produces this thing.

(What it is) Today, I would like to share with you some information about a popular food made in my country. It is bún, Vietnamese for the rice noodle which **bears a striking resemblance** to Singapore's bee hoon. However, bún is much bigger than bee hoon and it's also more tender.

(What it is used for) Bún is a main **ingredient** in many Vietnamese dishes, from Bún Bò Huế (Hue beef rice noodles) to spring rolls. It would be a huge mistake if

someone went to Vietnam without trying at least one dish that had bún inside. It **makes my mouth water** just to think about the **savory** Bún Bò Huế that I had right in the city of Huế, which is the origin of this dish.

(How it is made/produced) Normally bún is mass produced because it is comprised of many different stages which require a heavy amount of force. Firstly, rice will be put in a massive bucket of water and it chills there for two days. When it is tender enough, it will be ground into powder. In the following step, the powder will be put in a machine as it produces the noodles that we know. During this stage, the noodles are heated inside the machine so that they are safe for consumption. As soon as they are taken out of the machine, they will be **soaked** in cool water. At this stage, the noodles are ready for consumption.

(And explain why your country produces this thing) Vietnam produces this special food because it was simple to make in the past and the ingredients could be easily found. Bún is made of only one ingredient – it is rice.

Food Production:

Q. What are some of the main food products ("foods") that your country produces?

As our economy is mostly driven by agriculture and our culture is heavily linked with rice, most foods from Vietnam are made of rice. Phở, which is known as one of the best dishes worldwide, and hủ tiếu, spring rolls are all made of rice. Apart from rice-based foods, we also make pretty good candied coconut, which is a traditional food on Lunar New Year.

Q. What are some food products that come from different parts of your country?

The North is famous for Bún Riêu, which is rice noodles with crab soup, while Central Vietnam is well-known for Bún Bò Huế aforementioned. Meanwhile, Bún Nước Lèo, once fascinated Gordon Ramsay, is a **delicacy** in which the floating villages in the Mekong Delta, Southern Vietnam take pride.

Q. What widely consumed food products are mainly imported into your country?

Previously, **dairy** products such as cheese and other milk-based products could not be made in Vietnam because of the climate conditions, thus all dairy products were imported directly from Soviet Union. However, as food manufacturing technology

has witnessed some significant progress, we can curb our reliance on other countries for such products.

Q. Do you think it's important that a country is self-sufficient in food?

It is very important for a country to become self-sufficient in food. If a war happens to **break out**, or relationships between countries **turn bad**, all trading activities will be **halted**. Q. Do you think every country should make everything it needs or should it import some things?

There is no point in putting too much effort and money into producing food that can hardly be produced because of the local natural conditions. Importing such kinds of food from foreign countries is more **cost-effective**.

Q. What are the disadvantages of a country producing everything it needs?

The efforts put into producing everything a country needs may end up **going to waste**. For example, it is impossible to grow kiwis in a tropical climate like Vietnam's. Thus, however hard governments try to draw scientists' attention, the likelihood of success of such expensive projects remains low. Not only may such an idea lead to a waste of time, it is also costly and leads to nowhere.

(Where you went) I would like to talk about one of the worst journeys of mine. I went on this journey a while ago, one year to be precise, during my trip to Bali, Indonesia. Due to the fact that **tourist attractions** in Bali were located quite far away from each other, we had to rely on car **rental** services offered there. One service lasted 8 hours, any extra hour would cost an additional 20 dollars.

(Who you were with) I was travelling with other 6 cousins, which **eased the burden** placed on me. They were also relatively surprised that the traffic in Bali was that horrible.

(What was unusual) When **working on** the itinerary, I did **factor traffic jams in**, for which Bali is notorious. Yet, my trip from Denpasar to Ubud lasted up to 10 hours because of traffic jam, although I had decided to **drop** some sites. I nearly died in the car because my bladder was full but the car did not seem to be moving.

(And explain how you feel about it) In general, I still **dread** to think of commuting around Bali by car. Although I went **out of season** in the monsoon season, there were still **hordes of tourists**, which was the reason for the congestion on routes between attractions. Back then, I was **at a crossroads**, where I had to choose between embarking on further studies abroad or starting working full-time with my bachelor's degree. I wanted an option which would provide me a promising future and at the same time should be interesting as well. Understandably, higher academic qualifications nowadays are virtually a **prerequisite** for employment, especially in grey-matter fields where **rivalry** is **cutthroat** for graduates. (What you did after receiving it)

On receiving my question, she talked to me a lot and also pondered on it. Having weighed up the pros and cons of each scenario, she advised me to continue to study for a Master's degree instead of working early. I **resorted to** asking the lady if she would be so kind as to tell me the way to the Bus Station and she kindly replied by pointing to a building across the road and saying 'it's over there'. Without her help, I could not possibly have completed my trip in Thailand.

Part 3 questions:

❑ Which is more important, reading or writing?

❑ Well, I believe that both reading and writing play an important role in academic work and study. While reading gives you ideas and **widens your horizons**, writing is when you jot down what you have acquired from reading. For example, after reading a book, I usually write down what I have read and remembered, which acts as a **recap**, so I can have a better understanding of the book. If a person lacks either of the two, they may find it difficult to **speak their minds**.

❑ Who needs to have good writing skills?

❑ Personally, I believe that some professions such as content creator or writers should have **competent** writing skills. They are people who mainly represent the image of themselves or their organizations, and having good writing skills could bring numerous benefits to them. For example, if a writer has an attractive writing style, his books are more likely to be sold out faster than those of other writers.

❑ Where can people get more information, words or pictures?

❑ For me, I can acquire more information from pictures. People usually say that a **picture is worth a thousand words** and I believe it is true. For example, if a kid sees a **lively** picture, he or she can easily convey the information in that picture, which also boosts their creativity compared to **dull** books full of words. When reading a book, some people can find it hard to digest.

During my high school time, **sitting exams** were really **nerve-racking** which **drove me crazy** sometimes. However, there was a time I **fell behind with my studies** when I got a D in a Chemistry test. Therefore, I **was left with no choice** but to **make up** a story to make my parents believe me.

(***Why you did not tell the truth***):

I have always been a little boy to my parents, especially my mom, who **spoils** me a lot. In order to **live up to my parent's expectations**, I have to study under a lot of pressure to make them proud. I still remember sitting the Chemistry exam and I felt that I was going to fail this test. The moment I received the test result from my teacher, I was really anxious. Therefore, I had to tell a lie to my parents so that I could avoid being **punished** and **letting my parents down**.

(***Who you did not tell the truth to***):

It was my parents to whom I lied. Having known the result, I came home with a nervous look on my face. I informed my parents of my test results immediately. My parents were obviously **pissed off** when I lied to them. Seeing how they reacted to my testing result, I just wished that I had not told them **a falsehood**.

Part 3 questions:

- ❑ Do people in your country judge people when they lie?

Q Yes, I do think that people will face judgement when they lie to someone.

Vietnamese people usually say “**Fool me once, shame on you. Fool me twice, shame on me**” and I believe it is true. For example, if a company fails to make their promises to their counterparts, they are less likely to be chosen for the following projects.

Q How should we tell if it's a white lie or not?

Q Well, there are some ways to find out if a person is telling a white lie. Actually, we can focus on their facial expressions. For example, if a person is telling a white lie, their eyes will dart **back and forth**, which indicates that they are feeling uncomfortable.

Q Is it acceptable to tell white lies?

➔ I think there are times when it is suitable to tell white lies to other people. It is the time when they are asking about something that they really like, like their haircut or maybe their new skincare – they think that they are glowing with new skin care or they are proud of their achievements, but if we are not necessarily impressed by that, we can tell a white lie in that situation, we don't have to be honest with them, I think that's a suitable time to tell a white lie. Q When do people often lie?

➔ There are various reasons why people often lie. However, I think the key reason why they may tell a falsehood regularly is because they don't want to disappoint other people. For example, I told lie to my friend about her haircut, which was not great because I was worried that the truth might worsen our relationship.

Q Why do some people keep telling lies?

Q Maybe because some people consider telling lies an **inconsequential** issue; therefore, it gradually becomes a habit and they just cannot give up on it. For example, my friend had to lie to her parents about her test results, and day by day, she **was accustomed to** lying to other people.

(What encouragement she/he gave you to achieve your goal)

At that time, Chau was always beside me, she said things would become brighter and I was strong enough to confront such a challenge. Therefore, instead of being disappointed and **demotivated**, I displayed a firm commitment to change and try harder. I followed Chau's advice, seeking assistance for my essays and language skills. As a result, in grade 12, I improved **vastly** and won a place in the school team for the National Contest.

The Lunar New Year, or Tet, is a very special traditional holiday in my country. It was probably my most favorite holiday when I was a small boy as my family did a lot of activities to celebrate this occasion. Among them, making Chung cake made me

excited the most. Traditionally, we always make Chung Cake 2 days **prior to** Lunar New Year.

(Where you do it)

We have a big **yard** behind our house, and it is where Chung Cake is made, from preparing ingredients, to shaping the cake to cook it. In recent years, my family has not had enough time for making Chung cake on our own. However, to me, a **ready – made** Chung cake that we buy from a local market cannot bring the same special feelings and replace the taste of a Chung cake from my childhood. I hope that my family can continue our tradition in the coming years.

Part 3 questions:

❑ Do men and women enjoy the same leisure activities?

❑ I don't think so. I believe that men and women are born with **distinct** characteristics and personalities; therefore, their choices of leisure activities might also differ from each other. ❑ What types of leisure activities are popular in your country?

❑ Why is it important for people to have time for leisure activities?

It helps us recharge our energy after a **nerve-racking** day, avoid being **overloaded**. For example, reading books when you have free time helps you become a **well-rounded** person and **let off some steam** after working under a lot of pressure.

☐ Why are some activities more popular than others?

☐ It is quite natural that people would prefer some sorts of leisure activities than others. I believe that the history and **socio-cultural** background of a nation influence the type of leisure activities people do. For example, teenagers in some Asian countries often make kites and fly them while this is not the case in many western countries.

☐ Are there types of leisure activities that are as popular today as those that were popular when your parents were young?

☐ No, as time has gone on, the popularities of different leisure activities have also changed. For example, when our parents were young, activities like watching TV/movies, visiting some popular cafés/restaurants and visiting families/relatives were more popular. But, today, activities like visiting a gym nearby, shopping, and playing video games have grown equally popular because of technological advancements as well as increasing health and fashion awareness.

I worked so **diligently** for an international organization for a duration of 2 months and received a **substantial** amount of salary. At that time, I was just 16, so receiving this was really rewarding and I wanted to share it with my beloved ones.

That day was in mid-October, so the weather was quite chilly, yet suitable for such an intimate gathering. (And how you felt about it)

This small celebration means a lot to me, as it not only marked my little accomplishment, but it was also a **family reunion**. We **had a whale of time** at the restaurant with extraordinary dishes and professional service, which pleased every member. (Who this person is) Today, I would like to share with you about a time I first met one of my best Singaporean friends - Wenxin. She's a 17-year old Singaporean student who studies 3 core subjects: Mathematics, Physics and Chemistry. However, an **abiding** passion for environmental science gave her the incentive to take Geography along with the aforementioned 3 subjects in preparation for her entrance exam for the School of Design and Environment of the National University of Singapore.

(Where you met him/her) We were on the same trip called Temasek Overseas Outreach Programme in order to teach English to the children and helped concrete a school yard in Ben Tre province, Vietnam. Wenxin and I were in the same group, which meant that we **joined hands** to prepare and deliver the lessons.

(What you talked about) Our first talk took place when we stopped over at a rest stop **en route** to Ben Tre from Ho Chi Minh city. We talked a lot about school stuff since we were both students. Hardly would I expect an Asian student to study Geography as it is not deemed a promising subject like Maths or Science, therefore it really did **come as a surprise** to me that she turned out to be a Geography student.

(Why you had to stay awake):

You probably know that Tet or Lunar New Year is one of the biggest festivals in Vietnam. There are a lot of activities taking place before the Lunar New Year, and making Chung Cake is one of them, which excites me the most. However, the process of making Chung cake is **time-consuming** and requires the contribution of several people. It takes up to 12 hours for the cake to be cooked. Therefore, I and my cousins had to spend the whole night watching the cake.

If it were not for those applications, they might not know what problems they are facing.

❑ How do you avoid falling asleep when you are at a meeting?

❑ I think that the key factor which keeps people awake at a meeting is that they should go to bed earlier than usual, or the tiredness because of insufficient sleep will **drain their energy** the next day. 54. Describe clothes you wear on special occasions

You should say:

- *What they are*
- *Where you buy them*
- *Why you wear them*
- *And what people think about them*

(What they are)

Most of the time, I prefer to dress in clothes which are comfortable, and in which I feel **at ease**. For the majority of special occasions, therefore, I like to wear smart but casual trousers, white blouses and sometimes a jacket. **From time to time**, when the social event I attend requires a higher level of formality, suits and formal shoes would be **indispensable** items for my overall appearance.

(Where you buy them)

Well, most of my casual clothes, even the smart ones, come from markets and common fashion **brands**, like Zara or H&M, because they are relatively **affordable**. However, I do **set higher standards for** my formal clothes, especially in terms of the materials. Therefore, I occasionally buy some quality white blouses from a first-class fashion **brand**. I have sometimes bought clothes online for special occasions, but I prefer to try them on and also to see the quality for myself. I have to admit that I also like the wide range of choice in the shops.

(Why you wear them)

Actually, I prefer the combination of a blouse and formal trousers to wearing a dress or trying **to keep up with the latest fashions**, for a number of reasons, one of which is probably my character. Despite being a girl, I am more into comfortable clothes and find wearing dresses or skirts fairly uncomfortable. Besides, a white blouse is **suitable** for people of any age or gender and almost all occasions. Normally, formal clothes would make you look more mature, but a combination of a white blouse with trousers still gives you a smart yet **youthful** look.

(And what people think about them)

All of my family members really like to see me wearing formal clothes, as the outfit helps to add a few years to my **childlike** features. For others, I think this look is perfectly suitable, because it shows my politeness and respect for the events I am involved in. However, I think that my friends prefer me in elegant, feminine dresses, as a girl in a white blouse may not really impress others. I prefer to **dismiss these traditional ideas**. Provided that I dress smartly for special occasions, I like to choose clothes to please myself, rather than wear the clothes that others would choose if they were me.

Yet, at the same time, one's **fashion sense** or character also play a huge role in outfit choices. *(Give an example - often a personal example)* For example, on occasions that require formality, I prefer white shirts and trousers to elegant dresses, as this style is smart and suits me the most.

2. Is it possible to look good without spending lots of money on clothes?

(Give a direct answer to the question) Yes, possibly *(Explain your reason or reasons)*

Actually, it is not **extravagant** items but rather a person's taste of fashion and other factors that make himself or herself truly attractive. *(Give an example - often a personal example)* From my own experience, I have a lot of peers who know how to **mix and match** different items of clothing that go well together. Surprisingly, many of their clothes are even secondhand or real **bargains** from cheap markets. *(Explain the opposite or alternative)* However, quality clothes do help improve one's overall appearance, so they are certainly worth the money.

Practically, a trend, by definition, doesn't last. *(Give an example - often a personal example)* If you follow this industry minutely, you will understand it's not only changing, sometimes old fashion trends also make a comeback, e.g. crop top, boot-cut jeans, white eye liner. *(Explain the opposite or alternative)* However, some kinds of clothes are always favored, such as jeans or T-shirts. These classics are elegant **staples** and styles that rarely change and look good no matter what other "trends" are going on.

5. Do you think people behave differently in different kinds of clothes?

(Give a direct answer to the question) Certainly. I once read a quote by Caitlin Moran that helps express this perfectly, which is: "When a woman says 'I have nothing to wear!' What she really means is, 'there's nothing here for who I'm supposed to be today.' " **(Explain your reason or reasons)** We use clothes in connection to the roles we're going to play that day, the situations and settings we're going to be in, and to express our mood. Therefore, the clothes we wear do affect not only how we act, but how others act around us. **(Give an example - often a personal example)** For instance, someone who dressed **immaculately** is more likely to attract interest and attention, which **in return** would make that person feel more confident.

6. Are people's ideas about fashion today the same as people's ideas at previous times?

(Give a direct answer to the question) Probably no. **(Explain your reason or reasons)** In **comparison**, fashion is regarded these days more highly than it once was, and the definition of trends has also changed considerably. **(Give an example - often a personal example)**. Just simply ask your mother and your grandmother, their concept of fashion will almost certainly contrast with each other and that of your own, which shows that ideas about fashion vary from generation to generation.

Luckily, I had the chance to learn the piano from a classically trained pianist who was willing to train me for free as there was a shortage of pianists for the church choir. Without hesitation, I **made up my mind** to follow him.

(where you learnt it) As I mentioned previously, I was trained to play the piano for the choir in my church's services. Also, because I did not have the instrument at that time, I had to learn the piano at the church. Albeit learning at a church, which is supposed to be a quiet and **solemn** place, all the sessions were full of laughter because there were also other fellows trying to play the piano with me.

(how you learnt it) Filled with **effervescence**, I was eager to play the first notes of my life. However, things did not go as expected as I started to realise that the piano was a lot harder than I had thought. Keeping in mind that the more I played, the better I would become, however, classical songs again posed a great challenge even when I felt that my ability to play the instrument was already **competent**. my mind but luckily, the trainer was making lots of effort to **keep the fire burning** inside me and I quickly got rid of that negative thought before being back on track.

(and explain how useful it was) I have been learning the piano for more than 10 years. Yet, I never stop learning new challenging classical songs apart from playing simple songs for the services so that I can ensure that my skills will not worsen. Indeed, it only took me around 1 year to play for the services quite confidently and smoothly.

I visited Seoul for seven days during last year's autumn with my friends. Although we tried a lot of delicious food and **went sightseeing** around the city, I was looking

forward to the Nami trip the most in order to **accomplish** a secret mission. I was lucky to visit the island during its **peak** of autumn, and there were a lot of maple leaves on the island. To be honest, it was the first time I have ever seen maple leaves.

Therefore, I decided to pick some up and brought them home.

(What you did with it after you brought it home)

So, I gave my friends the maple leaves I brought from the Korea trip as a gift, and I could tell by their faces that they were completely **blown away** when seeing the maple leaves despite the fact that their color was **faded**. Some of my friends even kept the leaves in their books as a bookmark. ***(and explain why you think it was something special)***

Visiting Korea in autumn and witnessing maple leaves were a **once-in-a-lifetime** experience for me, especially when I am living a tropical country, which means that seeing real maple leaves in person is almost impossible. That's all.

57. Describe a time when you heard a person talking on the phone in the public places

You should say:

Some people like talking on phones on public transport, what do you think about this situation?

➔ Well, I do not see any problems with that at all since every now and again we may receive some **urgent** calls which need to be answered **at once**. For example, a person cannot decline a call from his boss while he is on a bus. I believe that as long as you have the right attitude towards answering calls in public, then calling or talking to someone on the phone is not an issue at all.

What are the bad effects of talking over the phone in public?

➔ There are some obvious negative sides of talking over the phone in public. Firstly, some people may talk loudly on the phone, which disturbs other people and therefore is construed as rude. Secondly, their private information might be revealed because of some **eavesdroppers**. Thus, I believe everyone should be aware

of **courtesy**, which means, everyone needs to consider the people around them when answering calls.

Why do people always break the rules?

☐ I suppose that people break the rules to fix what is broken inside them which is known as **retaliation** or revenge. They don't even mind breaking the most binding laws to appease what is broken inside them. (What it was like) The school was a 4-story building in a U-shape with over 1000 students and more than 40 awesome teachers. In addition, we even have a big hall room where we used to gather together and gossip with friends. Q. How are education priorities today different from those in the past?

☐ In a fast-changing world we are in today, education priorities have transformed as well. In our current society, education opens more opportunities to gain a wider

Q. What is your opinion on the way languages are taught in schools?

☐ Personally, I think that there should be some adjustments on how students approach language courses at school. Obviously, at some schools, students and teachers sole rely on theoretical lessons without focusing on other skills such as writing or speaking. For example, during my high school years, speaking was not highly stressed on my school curriculum; as a result, I was **a fish out of water** in English conversations with foreign friends.

Q. How can the type of school you go to affect career success?

☐ Well, I am currently pursuing my **bachelor's degree** at a **state school**, and I think there are certain aspects which can affect career success. In a state university, there are fewer chances for students to connect with **alumni** compared to **private school**. If a school has enthusiastic alumni, they can help students find **internships** or even jobs.

Q. What changes do you think will happen in the classroom in the near future? ☐ I believe that there will be some significant changes in the classroom related to technology. Teachers may not need to travel **back and forth** to impart knowledge to their students. For example, in this day and age, students can **attend classes** regardless of distance to widen their horizons, which are more accessible than traditional classes.

Q. What important lessons can we learn from schools?

☐ Obviously, besides helping students become **well-rounded** people, schools also shape their personalities. At schools, they are taught how to solve problems by themselves, or to work efficiently as a group. For example, thanks to my time at

university, I have become mature and financially independent. If it were not for schools, I would not have the chance to expand my horizons.
